

## Share Your Knowledge

If you are an expert in your field of **electronics**, why not share your knowledge with the world?

Electronics For You invites electronics professionals and industry experts to write articles on their area of expertise and interest from different perspectives

Some of the topics we want you to write about are:

- Photonics: Optics & Optoelectronics
- Automation
- Power Electronics
- Components
- Telecom

So if you have an interesting topic or original article to share, please let us know at [efyeditorial@efy.in](mailto:efyeditorial@efy.in)

*We would love to hear your good ideas too!*

FOR YOU

The Sensoria socks

results. It puts special emphasis on your body muscles to determine real-time biometrics like muscle activity, calories burnt, duration of activity as well as heart rate. All these are detected by the sensors embedded throughout the fabric and transmitted through the Athos Core clutched to the garment using Bluetooth and displayed via a mobile application. It is compatible only with iOS and can be purchased for about ₹ 23,000 (\$349) from Athos website.

**Sensoria socks** are made of a smart fabric that can capture data related to walking or running, like cadence, distance covered, motion pattern and duration, and so on. The top of socks is clutched using an elec-

Mijia smart shoe

The Mi band

tronic ankle, which transmits the captured data to a smartphone via bluetooth. The data can be viewed in real time on a proprietary mobile application.

Smart shoes are aplenty in the market. Under Armour offers a range of smart shoes, including **HOVR** that brings a lot of unique features in terms of profiling run and cycling sessions, workouts and motions. The shoe is made of soft fabric with a tender foam that keeps the foot comfortable. It costs around ₹ 7000 (\$110).

Xiaomi has brought its own version of smart wearables in the form of a wrist-gear called **Mi Band**. The device consistently tracks your activities like number of steps and distance covered throughout the day, calories burnt and more. This data can also be viewed on your mobile through the respective mobile application. Mi-Band is a budget-friendly device that costs ₹ 1299.

Xiaomi has also developed its own brand of smart shoes. Made of a resistant yet flexible material, its Mijia Smart Shoes are anti-slip and comfortable. Additionally, these track all the fitness data quite accurately in real time, which can be viewed from the mobile application. Mijia Smart Shoes are priced around ₹ 4000 (\$60). **EFY**
