

Soundgear

For hands-free and ear-free wireless sound

HARMAN International has launched JBL Soundgear—a wearable device around the neck for hands-free and ear-free intimate sound experience.

The device connects seamlessly through Bluetooth to smartphones and tablets. Users can enjoy mobile virtual reality headsets, such as the Samsung Gear VR, using the wearable sound device to create a powerful audio experience with JBL Signature Sound. Additionally, the wearable sound device can play for up to six hours before requiring

recharge.

The device includes a versatile, dual-microphone conferencing system with echo and noise cancelling technology to ensure sound clarity for crystal-clear conversations. The echo cancelling mic also allows users to take phone calls without worrying about sound quality or interruption. The rubber anti-slip treatment ensures the device stays put when moving around, and soft-touch fabrics provide long-lasting comfort.

Apple launches App Store v5.0

Apple has revamped its App Store—a platform from where iOS users can purchase/download other apps and update the existing ones. The update brings the version to 5.0. As part of the update, the app store is now more personalised as it now shows recommendations, suggestions, sessions based on products you already have and much more.

“Unlock a more personal, relevant in-store experience. Get product and session recommendations, see Favorites in stock, and scan and buy accessories right from your iPhone,” says the changelog.

SwiftKey 7.0 brings in big changes under a small ‘+’

Microsoft's intelligent keyboard SwiftKey has launched its 7.0 update, which replaces the existing Hub with Toolbar—an expandable menu that gives fast and easy access to a host of new and existing frequently used features, on both Android and iOS. Toolbar can be found under the new ‘+’ sign on the left of the prediction bar. Also included in the update are

stickers, which provide SwiftKey users with a way to add extra personality to their message. Some sticker packs can be edited before insertion.

StupidApp lets you learn and earn

With StupidApp, quiz lovers can enhance their knowledge, earn money and learn too. StupidApp is an interactive live quiz gaming app that already has 450,000 registered users and a daily active user base of 200,000—mostly aged 16 to 25, and 30 to 40 years. It expects to register another 600,000 users by the end of Q1 in 2018.

Learn to sing with TSM's app

TSM's (True School of Music) Learn to Sing app teaches you to sing accurately with real-time feedback as well as personalised guidance and feedback from highly qualified and experienced international music faculty. It also features a host of vocal technique exercises that help improve your breathing techniques, vocal range, pitch, rhythm, projection, dynamics and expression. There are 60 levels to learn, which are divided into five stages. Each stage has three grades and each grade has four levels.

Are You In Suspense?

Are you wondering what happened to your order or payment, even after a fortnight? But did you mention your name and address clearly while sending payment, and what the payment was for?

We get several payments every month without adequate instructions or even identity of the person sending the payment. As a result we are unable to take appropriate action on these, till we get a complaint - if at all.

At EFY, we want you to be our satisfied customer. So please do let us know in case your payment or instructions are not even acknowledged within a fortnight. We are not that lazy!
