Brookstone pain-relief wand

An alternative to the traditional ice packs or heating pads, it is an instant hot or cold pain-relief wand that cools to 6.1°C (43°F) and heats to 40°C (104°F) in just one minute. It is powered by four AA-size batteries and uses hot/cold therapy to reduce pain, treat aching muscles and stimulate circulation. It is available on Amazon.

Fitbit Aria weighing device (Courtesy: <https://www.bestbuy.com>)

Fitbit Aria

This high-tech weighing device lets you track your body mass index (BMI) and body fat percentage. You can share the collected data wirelessly with many other apps or your computer for tracking. The device gives a notification on your smartphone when you achieve a fitness goal. It is available on Amazon.

AliveCor compatibility with phone and smart watch

AliveCor heart monitor

It is a mobile-phone based electrocardiogram (ECG) monitoring band that lets you track your heart health anytime, anywhere. The tiny, slim and simple device attaches to your phone case. Simply open the Kardia app on your smartphone, put your fingers on the electrodes and see results instantly. It records and collects the ECG data for post-process health analysis. Relevant data helps doctors to diagnose health issues more accurately. AliveCor heart monitor is available on Amazon.

Atmotube

It alerts about the presence of harmful gases like CO and volatile organic compounds in real time via a free mobile app. It also measures air humidity and ambient temperature. Its compact size and USB connectivity allow you to use it anytime and anywhere.
