Association of Korea (TTA) and Telecommunication Technology Committee, Japan (TTC).

IEEE 802

The largest executed and adopted standard for wireless communication, IEEE 802 mainly works on Layers 1 and 2 of the Open Systems Interconnection (OSI) reference model. Almost the complete set of standards within IEEE 802 consists of the present and future packet networks.

IEEE 802 LAN/MAN Standards Committee consists of about a thousand participants. IEEE 802 standard addresses different ranges, from personal-area networks to local-area networks, metropolitan area networks and regional-area networks. These, however, are not restricted by size so far.

IEEE 802 standard finds numerous 5G and other applications:

1. IEEE 802 projects and decides architecture, internetworking, security, network management, time-sensitive networking and protocol layers above Layer 2.

2. IEEE develops standards for Ethernet environments like data centres, wide-area networks and automobiles.

3. IEEE 802.11ad and P802.15.7 support extremely high level of throughput under 5G. IEEE 802.11ah is best suited for spectrum under 1GHz, with focus on the Internet of Things (IoT) support.

4. The IEEE 802.21 working group is creating the P802.21.1 standard to provide media-independent services such as home energy management system, software-defined radio access networks, radio resource management and device-to-device communication.

The bottom line

With ever-increasing number of

communication channels and devices, standardisation becomes necessary to bring everything together. Else, we will live in a world where everything communicates within itself but fails to deliver for everything else! **EFY**

Original, innovative circuit ideas are invited

from designers and
experimenters
for publication in EFY magazine

Honorarium (minimum ₹1,000)
will be paid to the contributors soon
after publication of their articles.

Complete details may be sent to the
'Editor, Electronics For You,
D-87/1, Okhla Industrial Area Phase 1,
New Delhi 110020'
or emailed to editsec@efy.in
