

FEEDBACK

YOUR SUGGESTIONS

BACK ISSUE ARTICLES

Electronics For You (EFY) has become inevitable for hobbyists, engineers as well as students. However, I find it difficult to find specific articles in previous issues. Therefore I request EFY to provide the list of published articles based on their categories/sections (such as DIY and Tech Focus) as a PDF document for subscribers at the end of every year.

EFY. Thanks for your feedback! We are in the process of implementing your request.

QR CODE IN EFY

EFY magazine is a rich information resource that provides useful links to my topics of interest. But to visit the information on these links, I have to type or search for the same on my smartphone. Since smartphones provide instant access to the Internet, I suggest EFY to provide QR code for each link or website mentioned in the magazine.

EFY. Thanks for the feedback! We are considering your suggestion for implementation.

SENSORS AND ARTIFICIAL INTELLIGENCE

In the last two years, a silent artificial intelligence (AI) driven revolution is unfolding right before our eyes on smartphones, fueled by sensor data that promises far-reaching disruptive consequences across domains such as privacy, security, healthcare, videography and entertainment. But, unfortunately, this is not covered much by the Indian media at large.

In this regard, I would like to offer my services to your esteemed magazine in the form of regular articles on these specific domains. I would be glad to offer my services at no cost for the sheer joy of giving back to the magazine that I grew up reading, and also to enhance awareness on these topics in India. (My hobby project titled 'Two-wheeler Security System' was published in EFY 2005.)

Also, given that I live in San Francisco bay area, I will be happy to cover technical events held here in the Silicon valley that I happen to attend.

Kindly let me know about the next steps that you suggest.

Vinay Prabhu

Through e-mail

EFY. Thanks a lot for writing in and sharing your ideas and appreciation for EFY. We will be more than happy to accept your technical articles for our magazines and/or websites. Plus, we would be happy to publish on our websites reports on latest technologies and solutions shared at tech events.

SENSORS MAGAZINE

We want to subscribe to your magazine on sensors. Please send us a sample of the magazine and also subscription charges for the same.

V.V. Masurekar

Proprietor
Shreyas Industrial Estate, Mumbai

EFY. We have published many articles on sensors in various EFY issues earlier. In fact, this January onwards, EFY has started a regular section on sensors. However, please note that we do not have a separate magazine on sensors right now.

IoT PROJECTS

I am interested in smart home gadgets based on the Internet of Things (IoT). Please provide a list of IoT-based

projects published in EFY.

Ranveer Singh Bais

Through e-mail

EFY. You may refer to the following projects:

1. Getting Started with NodeMCU Development Board for IoT in EFY Nov. 2017
2. IoT-Smart Alert Notification Using Android App in EFY March 2017
3. IoT Based Smart Camera Using Android App and Raspberry Pi in EFY Nov. 2016
4. IoT WiFi Temperature-Logging System in EFY March 2016
5. Introduction To Smart Wi-Fi in EFY March 2016

You can purchase EFY magazine from various online stores including magzter.com, lulu.com, amazon.com and scoop.com

EDA TOOL

We are preparing an article on embedded live webcam for submission to EFY. Please let me know which EDA software is used to draw schematic diagrams and PCB layouts.

M. Kathiresan

Through e-mail

EFY. We use gEDA, which is an open source software for circuit and PCB layout design. If you want design circuits the way these are published in EFY, some customisation is required in gEDA software.

ANALYSIS OF TRANSFORMER

The 'Analysis of Transformer Inrush Current Using Java' DIY software article published in February issue is a good project for a reader like me. Thanks and keep it up the good work!
