

A man with a beard and short hair, wearing a light-colored button-down shirt, is looking directly at the camera. He is standing in a server room with rows of server racks visible in the background. The racks are filled with various electronic components and cables. Overlaid on the bottom right of the image are four different types of Positronic connectors: two blue multi-pin connectors, one black multi-pin connector, and one black multi-pin connector with a different pin configuration.

42 Thousand Servers.
21 Megawatts of Power.
Zero Margin of Error.

When you're managing a data center that draws more power than a small city, you can't afford a meltdown. At Positronic, we build high reliability, power-efficient connectors. But our true call is to provide certainty. Rock solid, mission-critical performance upon which you can bank life and limb, family and fortune. We consider it an honor. We consider it an inviolable trust.

POSITRONIC. THE SCIENCE OF CERTAINTY. // www.connectpositronic.com/efy_apr2018
