

is achieved by:

1. Smart motor tuning algorithm called AtomSENSE
2. Optimised motor design and material selection to reduce eddy current losses and copper losses
3. Stator and rotor design optimisation to reduce cogging torque and mechanical vibrations

AtomSENSE motor tuning and calibration algorithm precisely senses various motor parameters in real time and controls the motor in a closed loop. There are various motor parameters that need to be precisely measured for driving the motor efficiently with zero noise.

Motor phases are excited with a smooth sinusoidal current profile generated by the motor driver. This reduces harmonics and thus noise and power loss.

The Atomborg team has won accolades such as:

1. National Entrepreneurship 2017 Award by Ministry of Skill Development & Entrepreneurship, government of India

2. Global Climate Solver Award by World Wildlife Fund

It has also participated in Global CleanTech Innovation Program, organised by United Nations Industrial Development Organisation in San Francisco, USA.

Business Transformation For The Digital Age

Kliento Technologies helps enterprises redefine their businesses for the digital age. Through innovative technology solutions built

around digital, IoT, cloud, automation, analytics, infrastructure management and engineering services, it solves complex business problems for its customers.

Founders Anurag Sharma, Shubhee Jaiswal and Avinash Bandil consider Kliento as a 'next-generation' technology firm, which not only provides a roadmap for the future but also a powerful model for any enterprise looking to thrive in this age of disruption.

Kliento provides end-to-end digital transformation experience to its customers. Its team works with clients to understand their business and pain areas and analyses past data trends to forecast new solutions. It works out the best way to prepare the customer's idea for development, review commercial and technical risks, and build the right product strategy to go to the market. After the client goes live, Kliento can have a support and maintenance relationship in place for ongoing work.

Kliento aims for the best utilisation of resources to maximise ROI for businesses. It empowers businesses with an easy application guide and training session to easily operate the solution and handle day-to-day operations and reporting.

Solutions offered include digital transformation, business consulting, enterprise transformation, salesforce services, Microsoft services, customised web and mobile app solutions, and application maintenance and support. Advanced service offerings include IoT, chat bots, data analytics, big data, data visualisation, artificial intelligence (machine/deep learning) and computer-vision image processing.

Solution applications include school/staff/resource tracking systems, vehicle tracking systems, industrial IoT offerings, food-ordering POS solutions, sales executive tracking/reward management solutions and event management systems.

Despite being quite new to the industry, Kliento already enjoys global presence and serves customers in more than five countries. It

is working in different industries including education, automotive, healthcare/pharmacy, e-commerce, hospitality, retail and supply chain.

Unique Mentorship Platform For Skilled Professionals

Founded by Deepak Goel, KarmaCircles is a unique peer-to-peer mentoring, networking and skill building platform where members of a community can give and receive professional help seamlessly. Communities include universities, alumni associations, corporates, co-working spaces, etc. One can create affinity groups, search extensively among members, ask queries, schedule time with each other, and publicly thank each other for their time and help. The community admin can get analytics on the effectiveness of communication, and achieve goals such as peer mentoring, fund-raising and engagement. Even if you aren't part of any premium community, you could join KarmaSphere—an all-inclusive community run by KarmaCircles itself.

KarmaCircles' growth strategy not only includes acquisition of new clients across the education, not-for-profit and start-up ecosystem but also places a great emphasis on the growth of its employees. HR policies such as monthly one-on-one career growth meetings have ensured that the company builds a team that is invested in its mission.
