

KarmaCircles team

KarmaCircles is trying to fundamentally change the way professional/social networks operate. A

typical social network encourages its users to share excessively, is addictive by design and doesn't care about

the users' time being wasted. KarmaCircles, however, has been designed as a utility product and saves users up to 90 per cent of the time wasted in getting help. The team believes that meetings with human voices involved cannot be replaced with texting or emailing, and have developed a proprietary AI-based algorithm that helps users schedule meetings effortlessly within minutes.

The platform has currently formed professional networks from institutes such as NMIMS, MDI, NDIM, FMS, NIT Kurukshetra and several IIMs along with a few NGOs and professional networking communities such as TIE Delhi.

KarmaCircles is available across all devices, which means you can access this app from your desktop PC, iPhone, Android phone, iPad or other tablets. **BY**
