

Haryana issues revised solar power policy guidelines

Haryana Renewable Energy Development Agency has revised its Solar Power Policy 2016 and issued guidelines for rooftop projects and third-party sales. The guidelines allow developers to set up solar projects anywhere in Haryana. The revised policy has raised solar renewable purchase obligation requirements to eight per cent by FY2022.

Xiaomi takes top spot in India's smartphone market

Xiaomi has taken the top spot in India's smartphone market, overtaking rival Samsung in July-September period of 2018. However, OnePlus continues to be the leader in the premium mobile segment in the same quarter, which saw record shipments despite the declining Rupee, as firms stocked up inventory ahead of the festival season, according to market research firm Counterpoint Research.

Streetlights in Zirakpur to get LED makeover

The streets of Zirakpur in Mohali, Punjab is set to embrace a smart lighting system that includes LEDs. Zirakpur Municipal Council will execute the energy-efficient LED streetlight project as a step towards making the city smart, a long-awaited move that will help instil a sense of security among residents, especially children and women, who often fear venturing out in the dark.

Infosys unveils 4.0 AI for global enterprises

Software major Infosys and Finland-based consulting and engineering firm Poyry have jointly released the 4.0 version of artificial intelligence (AI) framework for industry, utilities and infrastructure enter-

prises. According to the statement issued by Infosys, Kriti 4.0 version AI framework addresses lifecycle management challenges that the industry, utilities and infrastructure enterprises face in operational technology systems.

Seagate and IBM work together to help reduce global hard drive counterfeiting with blockchain

Seagate Technology and IBM have announced that they are working together to reduce product counterfeiting using blockchain and security technologies. The project, which is designed to help manufacturers, integrators and business partners fight counterfeit hard drives, uses IBM Blockchain Platform to authenticate the provenance of disk drive products, bringing a new level of multi-layered security protection to the data management industry.

Infineon acquires Siltecta, a specialist for silicon carbide

Infineon Technologies has acquired Siltecta GmbH, a startup based in Dresden. The startup has developed an innovative technology (Cold Split) to process crystal material efficiently and with minimal loss of material. Infineon will use Cold Split technology to split silicon-carbide (SiC) wafers, thus doubling the number of chips out of one wafer.

Rohde & Schwarz India wins Frost & Sullivan's 'Indian T&M Company of the Year' award

Rohde & Schwarz India was named 'Indian T&M Company of the Year' at Frost & Sullivan's 2018 India Best Practices Awards Banquet, held in Mumbai. The company has been a trusted T&M solution partner for more than two decades in India. It partners with various agencies, training institutes and technology companies to facilitate technology growth in the country.

Samsung and DoT to conduct 5G network field trials in New Delhi

Samsung and Department of Telecommunications (DoT) will be collaborating to conduct 5G network field trials in New Delhi during the first half of 2019. The South Korean telecom gear maker

has chosen Reliance Jio as the prime telecom partner for these trials.

Samsung is currently showcasing ways in which its 5G solutions will enable various 5G-powered scenarios and other business models. Demonstrated solutions include applications in home broadband services, in agriculture and in smart cities.

HCL announces ₹ 7.5 billion investment in Andhra Pradesh

IT services giant HCL Technologies has announced its plan to invest ₹ 7.5 billion in Andhra Pradesh (AP). Under this plan, two facilities will be set up, creating 7500 jobs in the coming decade.

According to HCL's official statement, operations will take place in two phases. An R&D centre with an investment of ₹ 4 billion will be built in the first phase, at Kesarapalli village in Gannavaram, within the next five years. This is expected to generate more than 4000 jobs for IT professionals.

The work for the second phase will start in a campus of 20 acres, which will be taken up later in Amaravati, the new capital of AP. Investments of ₹ 3.5 billion are expected for the second phase.

Innolux strengthens India operations

Innolux has reshaped its corporate structure by setting up two new business units—India Business Centre and mLED Business Unit, as it moves to respond to increasing competition in the display industry.

Newly-appointed vice chairman Robert Hsiao will head India Business Centre, which aims to strengthen the company's deployments in the local market as well as optimise its corporate efforts with original design manufacturer clients.

The company's executive vice president, Ding Chin-lung will concurrently head mLED Business Unit, which will focus on developing active matrix (AM) mini and micro LED technologies.

Innolux's AM mini LED technology is ready for volume production, with initial focus on large-sized display devices, including public information display (PID) applications.

700MW by this year end, and after that to 1GW by next year end.

Currently, there are two operational production lines. A third line will be operational by December, whereas a fourth line having a capacity of 300MW will be operational by end of 2019.
