

QUIKorrect – Static Servo Stabilizer

Technology transfer from MEDI

IGBT based PWM type STATIC VOLTAGE STABILIZER design PATENTED TECHNOLOGY

- No wear and tear like servo stabilizers
- No tap changing like SCR or relay based stabilizers
- 1% tight regulation
- 85V to 300V input range, output 220V +/-1%
- Long life and low maintenance

Highlights of QUIKorrect

- * Instantaneous correction. Speed over 20000V per second
- * Discrete IGBT up to 30KVA single phase and 90KVA three phase
- * Single PCB for control stage, IGBT driver section and power stage.
- * Single contactor for three phase system
- * Single LCD for three phases
- * LCD will display all the phase voltage, connected load etc
- * All protections included - low voltage, high voltage, overload and short circuit
- * Data of more than 1 year can be stored - input V, output V, load, power failure etc with date & time stamp. USB port for transferring data to pendrive.

Easy to assemble and low BOM

For video demonstration, go to google / youtube and search "QUIKorrect"

**BOM of a 20KVA single phase QUIKorrect
Static Stabilizer with input range +/- 10% = Rs.12000**

Technology transfer up to 200KVA three phase – Rs.11,00,000
