

NuMicro® NANO103 **Ultra Low Power Arm® Cortex® -M0 Microcontroller**

Ideal for smart door lock, card reader, portable healthcare device and GPS tracker

- 32-bit MCU, 1.8V~3.6V, operates up to 36 MHz, with 64 KB Flash and 16 KB SRAM
- Idle mode (75uA/MHz) and power-down mode (2uA) current consumption
- Fast wake-up from power-down mode: less than 3.5 μ s
- Multiple internal RC clock (HIRC), supports 4/12/16/36 MHz to meet diversified requirements
- Power Detect features POR, LVR and BOD to prevent system hang up
