

University/Institute name	Courses/Programme offered	University/Institute name	Courses/Programme offered
Amity University, Jaipur	BTech + MTech (Converging Technology that offers specialisation in Nanoscience and Nanotechnology) Dual Degree, and PhD (Nanoscience and Nanotechnology)	MS University, Tirunelveli	MSc (Nanoscience)
TAMIL NADU		Hindustan University, Chennai	MTech (Nanotechnology)
SRM University, Chennai	BTech, MTech and PhD	GKM College of Engineering & Technology, Chennai (affiliated to Anna University)	MTech (Nanoscience and Nanotechnology)
Bharathiar University, Coimbatore	MSc (Nanoscience), PGD (Nanoscience and Nanotech), MPhil and PhD	TELANGANA	
PSG College of Technology, Coimbatore (affiliated to Anna University)	MTech (Nanoscience and Nanotechnology) and PhD	Jawaharlal Nehru Technological University, Kukatpally, Hyderabad	BTech Mechanical Engg (Specialisation in Nanotechnology), MTech (Nanotechnology) and PhD
K.S.R. College of Technology, Thiruchengode (affiliated to Anna University)	BTech (Nanoscience and Technology), MTech (Nanoscience and Technology), and PhD (Nanoscience and Technology)	University of Hyderabad, Hyderabad	MTech (Nanoscience and Technology) and PhD (Nanoscience and Technology)
VIT University, Vellore	MTech (Nanotechnology)	UTTAR PRADESH	
SASTRA University, Thanjavur	MTech (Nanoelectronics), MTech (Medical Nanotechnology) and Integrated MTech (Medical Nanotechnology)	Amity University, Noida	MTech (Nanoscience and Technology), MSc (Nanoscience and Technology), and 3-year MSc+MTech (Nanoscience and Technology)
Mepco Schlenk Engineering College, Sivakasi (affiliated to Anna University)	MTech (Nanoscience and Technology)	CCS University, Meerut	MSc (Nanotechnology)
University of Madras, Chennai	MSc (Nanoscience)	Baba Saheb Bhimrao Ambedkar University (Central University), Lucknow	MTech (Nano-Optoelectronics)
Noorul Islam University, Kumaracoil, Kanyakumari	BTech (Nanotechnology) and MTech (Nanotechnology)	AMU, Aligarh	MTech (Nanotechnology) and Advance Post Graduate Diploma (Nanotechnology)
Anna University, Chennai	MTech (Nanotechnology)	UTTARAKHAND	
Karunya University, Coimbatore	MTech (Nanotechnology), Int. MSc (Nanoscience and Technology) and PhD (Nanotechnology)	IIT, Roorkee	MTech Nanotechnology
Sri Ramakrishna Engineering College, Coimbatore (affiliated to Anna University)	MTech (Nanoscience and Technology)	UPES, Dehradun	BTech (Mechanical Engineering with Specialisation in Material Science and Nanotechnology)
Periyar Maniammai University, Thanjavur	MTech (Nanotechnology)	WEST BENGAL	
		Jadavpur University	MTech (Nanoscience and Technology)
		CRNN-University of Kolkata	PhD (Science) and PhD (Tech) in Nanoscience and Nanotechnology
		Amity University, Kolkata	PhD

nanotechnology for:

1. Early translational science through innovation for future application strategies

2. Translational research for proof of concept leading to product development

3. Innovative tools and technology for pre-clinical research in priority areas

ICMR. ICMR has formed a task force on nanomedicines, and funded various activities on nanotechnology and nanomedicine.

MeitY. MeitY has funded more than 45 projects in various areas of nano-electronics, such as LEDs, OLEDs, organic electronics, flexible electronics, carbon materials, pulsed laser techniques, nano-fabrication, silicon-based materials, III-V and

II-IV materials, plasma-based CVD, sensors, band-gap materials, simulation, spintronics, data storage, MEMS, NEMS, nano-crystalline materials, devices and advanced nano-materials for sensing, health, detection, agriculture and neuroscience. The best and most productive initiative was CoE in Nanoelectronics (CEN) at IISc and IIT Bombay, and Indian Nanotechnology Users Programme (INUP phases I and II). Outcomes have been extremely promising with nearly 72 patents and more than 1000 papers.

Nanotechnology intervention in the field of agriculture has already started in India through various R & D projects, including:

1. Crop protection
2. Fertilizers
3. Soil quality improvement

4. Water purification and pollutant control

5. Sensors for environmental monitoring

6. Breeding

7. Nanomaterial production from agricultural resources

Apart from the above stated, established companies and various startups have also entered the market of nanotechnology in various domain areas of nanoscience and nanotechnology. Some such companies are:

1. Adnano Technologies: Carbon nanomaterials and advanced characterisation instruments

2. Advanced NanoTech Lab: Coating products

3. Auto Fibre Craft (AFC) Powders: Specialised silver nanomaterials

4. AVANSA Technology & Services:
