

India to have EV charging infra policy soon: Power Minister

India would soon have a policy on electric vehicles (EVs) charging infrastructure that will allow individuals to establish charging stations for commercial purposes to push e-mobility in the country, according to R.K. Singh, Minister of Power and New and Renewable Energy.

Power Ministry has circulated the policy on EV charging among concerned departments and ministries for their comments and feedback. The policy also mentions that

every individual is free to establish EV charging station(s), Singh added while speaking at International Symposium to Promote Innovation & Research in Energy Efficiency (INSPIRE), jointly organised by Energy Efficiency Services Limited (EESL) and World Bank.

India needs infrastructure for EV charging to boost EVs. The country aims to have a considerable share of EVs on road by 2030, which is also in sync with the government's commitment to cut emissions by a third from 2005 level.

Kerala announces EV policy with full electrification plans by 2030

Kerala has come up with an e-mobility policy that promotes electric vehicles (EVs) like electric buses and e-auto rickshaws. The aim is to introduce public transport that reduces air pollution. It has announced its mission of full electrification of all types

of motor vehicles by 2030.

The e-mobility policy plans to have around one million EVs by 2022, and around 200,000 two-wheelers, 50,000 three-wheelers, 1000 goods carriers, 3000 buses and 100 e-ferry boats in operation by 2020.

ACE industry continues to grow in single digits: CEAMA

Consumer Electronics and Appliances Manufacturers Association (CEAMA), the apex industry body for appliances and consumer electronics (ACE) industry concluded its 38th annual function focussed on 'The Champions of Change—Moving Towards a Dollar Positive Industry.' Industry experts voiced their opinions on policy changes, and shared their recommendations to propel growth within the segment.

In association with PwC, CEAMA has unveiled a detailed report on 'Future of consumer durables and electronics in India—the changing landscape.' Besides leaping over 23 ranks in the 2018

ease of doing business index, the ACE industry still continues to grow in single digits.

The root cause of this has been the continual depreciation of the exchange rate, cost of compliance and frequent changes in policy and regulations. The large and young urbanised population, alongside growth and proliferation of connected devices and other emerging technologies will become one of the key drivers for the ACE industry, as it moves ahead.

The report further highlights the need to leverage customer services to drive revenue growth, and how automation and technology can help fuel the segments grow even further.

On The Move

Apple appoints Ashish Chowdhary to lead India operations

Apple has appointed Ashish Chowdhary as its India operation head. Chowdhary will join Apple India from January next year. The decision to hire Chowdhary shows that Apple is aiming for long-term growth in a price-sensitive market, where Apple is essentially an aspirational brand and usually bought by those with high spending power.

Arundhati Bhattacharya appointed as Wipro's independent director

Wipro has appointed former State Bank of India chairman Arundhati Bhattacharya as an independent director, with effect from January 1, 2019. The tenure of her appointment is five years, subject to approval from shareholders.
