TABLE III
REVENUE GENERATION BY PGMs
RECOVERED PER TONNE OF PCBs

Metal	Weight of metal recovered (in gm or kg/tonne of PCB)	Per unit (gm or kg) price	Total value (₹)
Gold (gm)	390	3000	1,170,000
Palladium (gm)	90	1200	108,000
Silver (kg)	1.5	47,047	70,571
Copper (kg)	190	435	82,650
Lead and tin (kg)	31	233	7223
Aluminium (kg)	145	103	14,935
Other metals obtained (per tonne of PCBs)	(Assumption)		10,000
Total (₹)			1,463,379

Points to remember

To set up a recycling business in India, you need:

1. Trade licence from local authority
2. Small-scale industries (SSI) unit registration certificate from Ministry of Industry
3. State Pollution Control Board's consent to establish as well as consent to operate

of a personal computer (PC). Amount of PCBs recovered from one tonne of PC waste = Around 40kg (0.04 tonne)

Therefore, revenue generated from one tonne of PC waste = ₹ 1,463,379 × 0.04 = ₹ 58,535

Revenue generated per kg of PC waste = Around ₹ 58

Scenario 2: Partial PGM recovery and repair to resell

Thirty-five per cent of the waste PC units are repaired and resold at the rate of ₹ 2500 per PC. Both these assumptions are conservative. The remaining 65 per cent is recycled as mentioned in Scenario 1.

Therefore the number of units repaired = 13 (35 per cent of total number of units)

Total resale price = ₹ 2500 × 13 = ₹ 32,500

Total value of PGM recovered from 65 per cent recycling = ₹ 38,047

Total revenue from one-tonne PC e-waste = ₹ 32,500 + ₹ 38,047 = ₹ 70,547

Revenue generated per kg of PC waste = Around ₹ 70

Therefore repair-and-resale model earns around 22 per cent higher revenue. **EFY**
