Gaming Headset and Mouse

Make gaming real

Acer has unveiled Predator Galea 500 gaming headset and Cestus 500 gaming mouse in India. The Predator Galea 500 gaming headset gives you cinematic surround experience with bio-cellulose driver unit. Acer True-Harmony 3D Soundscape technology recreates acoustic space based on the orientation of the player's head to give an immersive feel.

The Predator Cestus 500 gaming mouse features an ambidextrous customisable design with swappable side panels, 16.8-million RGB lighting with eight lighting patterns, five on-board profile settings, eight programmable buttons, precision movement and a gold-plated USB connector.

Home Security HD Camera

With two-way communication

Easy to configure, the iBall Guard PT HD camera lets you connect devices such as Android and iPhone smartphones with Wi-Fi Hotspot, enabling real-time viewing of your home and workplace while you are away at work. Its embedded microphone also enables two-way conversation. So you can converse with your kids at home from anywhere, anytime using your smartphone app.

Remote operation even allows you to rotate the camera by 350° and tilt the camera angle up to 105° for a complete overlook. Another superior feature is SD card storage, which makes your footages transmittable and shareable.

One of the best features of this security camera is the minimum illumination and 1.3MP high-resolution HD (1280 × 960P) camera. H.264 video compression with dual streaming (480P and 720P), allows you to view every moment.

Smart Android LED TV

Wide colour gamut with 16.7 million colours

Price
₹ 15,490

Daiwa's newest 81cm (32-inch) smart TV, D325SCR is a perfect match for living rooms with its good looks and chrome stands. It TV gives detailed picture quality with an A+ grade panel and 16.7 million display colours, which makes every picture reel look real.

Operating off Android 4.4.4 and dual-core 1.3GHz processors with 1GB RAM and 8GB internal memory, The TV

gives you smooth viewing experience and enhanced response stimulus. It provides an inbuilt access to the Internet using Wi-Fi support and several pre-loaded apps such as Netflix, YouTube and Google Chrome. It automatically closes applications that are not in use while being active in the background. This not just optimises RAM but also enhances TV efficiency.
