

Share Your Knowledge

If you are an expert in your field of electronics, why not share your knowledge with the world?

Electronics For You invites electronics professionals and industry experts to write articles on their area of expertise and interest from different perspectives

Some of the topics we want you to write about are:

- Photonics: Optics & Optoelectronics
- Automation
- Power Electronics
- Components
- Telecom

So if you have an interesting topic or original article to share, please let us know at efyeditorial@efy.in

We would love to hear your good ideas too!

Smartphone

Shoot and shop

Samsung Galaxy On7 Prime comes preloaded with Samsung Mall—a revolutionary new way to shop by shooting a product on your smartphone, finding out the best online deals and pay-as-you-go. It has a 14cm (5.5-inch) screen that allows immersive viewing, while its streamlined design makes it comfortable to hold. A slim and elegant 8mm full-metal unibody gives it a luxurious look and feel, while the robust 2.5D Gorilla Glass makes it durable and sturdy. The 13MP (f/1.9) rear camera with LED flash takes clear photos even in low light conditions, while 13MP (f/1.9) front camera shoots

Access various government services at one place

The government of India has launched UMANG (Unified Mobile Application for New-age Governance) app to provide access to various government services at one place. The app is a common platform for government services such as gas booking, Aadhaar, crop insurance, EPF and National Pension System. According to app developer SpiceDigital, the availability of the app in 12 regional languages in addition to English makes it user-friendly and relevant to tier II and III cities and rural areas. The app can be downloaded from the app store of one's mobile operating system. A link on the EPFO's website, <http://web.umang.gov.in>, also leads to the app's download page.

Google keyboard app for entry-level smartphones

Google is rolling out Gboard Go app to low-end handset users. Gboard is a keyboard app developed by Google for Android and iOS smartphones. The Gboard Go app is currently not listed on Google Play, but it can still be downloaded on smartphones with low RAM. Notably, the app is said to be rolling out to handsets running Android 8.1 Oreo. This means, as of now, only Google Pixel smartphones can run the app.

The prices, features and specifications are based on information provided to us, or as available on various websites and portals. EFY cannot vouch for their accuracy.

App to help you sleep better

A new sleep app Shleep is getting a lot of attention for its complex approach to assessing energy and sleep. The app offers a cool, comforting interface built around a philosophy involving understanding and behaviour change. Once a user opens the app, he sees a questionnaire after a short animated introduction. After viewing the video, the user can respond to questions about his age, screen time, lifestyle and sleeping habits. Then the app builds a tailor-made programme that sets out to improve that person's individual sleeping habits including mindful relaxation exercises and detaching from technology. The information is presented in a series of videos, combined with targeted exercises.

Desktop tool transfers photos from smartphone to PC in a blink

ScanTransfer, a free desktop application released recently offers probably the simplest way to transfer any media from a smartphone to a desktop PC. Once run on the PC, the application displays a uniquely generated QR-code on the screen and asks the user to scan it using the smartphone. Then, the application transparently creates a local network between the PC and the smartphone, allowing effortless transfer of video and image files to PC. Importantly, the QR-code shown by ScanTransfer can be read with a standard camera app of iPhone or Android Chrome browser as well as using Facebook or Twitter. No third-party QR-code readers are required.
