

TOP SEVEN SMART SECURITY ARSENALS FOR YOUR HOME

Nidhi Arora

For a long time I feared someone breaking into my unattended house while I was away on vacation—despite living in a manned gated society of New Delhi. Fortunately, today, there are a host of smart security systems available to keep our loved ones as well as valuables at home safe. Let's take a look at some of these

Samsung SmartThings

This home monitoring kit allows great control and monitoring, and is super easy to install—taking only about 15 minutes for the same. The set-up is completely wireless, requiring a working broadband connection at home and SmartThings app installed on the phone to monitor and get notifications about any unexpected movement in the house premises. The app also lets you control lights and other appliances. The Samsung SmartThings kit costs ₹ 30,000 onwards.

Belkin NetCam (Source: <https://the-gadgeteer.com>)

Belkin NetCam

Worried about the safety of your kids at home while you work in office? Or, looking to keep tabs on the new caretaker for your ill parents? Check out Belkin's NetCam HD wireless IP camera, which live streams video along with sound to your smartphone for monitoring. It costs ₹ 8000 onwards.
