

photoelectric, ultrasonic and magnetic. These are mostly used in object counters, process monitoring and control.

IoT platform

An IoT device is connected with other IoT devices, providing data through Internet transfer protocols. So the two main divisions in an IoT system are the network and IoT platform at the back-end and the sensors and actuators at the front-end.

Most of the IoT platforms are dependent on sensors. There are many IoT platforms available but two main IoT platforms that stand out are industrial and consumer. Both these platforms slightly differ in their applications and requirements. The industrial IoT platform must be stable, reliable and secure as the platform failure may cost millions of dollars or even lives. On the other hand, a failure in consumer IoT platform can be just an inconvenience to you.

However, there are some common parameters to be considered when choosing the best IoT platform for your application. Some of these parameters include reliability, stability, flexibility, security support, pricing model, mobile/web application support, ability to handle a number of connected products, data retention or backup when power or network connection fails, and the speed and time to launch the product.

BINAY - Lighting Up The Future

BINAY LED-based HIGH, MEDIUM and LOW Intensity Aviation Obstruction Light Beacons

As per International Civil Aviation Organisation (ICAO) requirements Available in Low Intensity, Medium Intensity and High Intensity versions (as per International Civil Aviation Organization guidelines), BINAY's patented LED Aviation Lights come with 5-year/3-year warranties

LED Obstruction Lighting for:

- Industrial chimneys and smokestacks
- Transmission, microwave and cellular towers
- Radio, TV and similar structural towers
- High-rise buildings and structures
- Airports and airfields

The BINAY LED Aviation Obstruction Light offers the following advantages:

- Fit-and-forget maintenance-free operation
- A long life of 100,000 hours (20 years at 12 hours daily burning)
- Pays for itself within a short period of operation in the form of reduced installation, maintenance and servicing costs
- Quick Installation; Reliable operation 365 days per year
- Shock-proof and vibration-resistant
- Over-Designed intensity to allow for natural LED intensity degradation over its operating lifetime

THE BINAY LED OBSTRUCTION LIGHT IS UNDER ACCEPTED PATENT, AND AS SUCH IS A PROPRIETARY PRODUCT

BINAY Opto Electronics Pvt. Ltd.

27, PANDITIA TERRACE, Calcutta 700 029, India
