

Electronics Projects Vol. 26 is the latest volume in the series, available in digital form.

It is a compilation of 21 construction projects and 71 circuit ideas published in Electronics For You magazine.

This collection of tested circuit ideas and construction projects in a handy volume would interest all classes of electronics enthusiasts—they students, teachers, hobbyists or professionals!

Electronics Projects Vol. 26 is available on the following digital magazine stores:

- www.lulu.com
- www.magzter.com
- Createspace.com
- www.readwhere.com

Some of the IoT platforms are listed below.

ThingSpeak. It is a cross-platform, open source IoT application and API to store and retrieve data from things using HTTP protocol over the Internet or via a local area network.

IBM Watson. It is an IoT platform backed by IBM's hybrid cloud PaaS (platform as a service) development platform, the Bluemix. It features device management, secure communications, real-time data exchange, data storage and weather data service.

Amazon Web Services (AWS) IoT. This IoT platform makes it a lot easier for developers to connect sensors for multiple applications ranging from automobiles to turbines to smart home light bulbs.

Microsoft Azure IoT. Its features include device shadowing, rules engine, identity registry and information monitoring.

Google Cloud platform. It is one of the best IoT platforms. It is a set of modular cloud-based services that allow you to create anything from simple websites to complex applications.

ThingWorx. It is one of the earliest IoT software platforms designed
