

EMPOWERING YOUR DESIGNS

Covestro constantly works on improving products and technologies to serve customers better and explore new markets. The development of innovative solutions to meet new customer requirements and inarticulate needs is very important to us. Covestro portfolio of polycarbonate resins and blends plays an important role in bringing these next-generation products to the market. The market for electronics, IT and communication devices is constantly evolving with a focus on "what's next".

High flowability, stiffness, good cosmetic, easy processing, flame retardance, dimensional stability are important properties that are highly requested by product manufactures in the electronic, information technology (IT) and Communication industries.

Our experts are happy to help your local Innovation & Design Development @ CCDC, Gr. Noida.
