

Are your IoT Devices geared up for hybrid and inter-operable networks?

An ideal IoT Solution should

- Provide various connectivity options including platform interoperability
- Guarantee message delivery through self-healing capability
- Provide secure data transfer supported by proper encryption and security policy
- Be cost effective, with lower total cost of ownership
- Have Fault Tolerant Architecture and High-Precision Network synchronization
- Have a rich interface for sensor and I/O control: SPI, UART, GPIO, I2C, ADC
- Be Hardware Agnostic and allow seamless integration with all hardware and platforms
- Be ANSI C MISRA 2012 compliant

nebulae.io

An IoT solution that helps you connect your devices seamlessly, securely and efficiently.
Visit us at EFY Expo 2018 booth I 55 to understand how we can help.
