

Shah Electronics, headquartered in Chennai and established in 1965 has been contributing in the development of the electronic industry having several innovative power source products – **AC to AC, AC to DC, DC to DC, DC to AC** etc. all under one roof. Having a state of the art in-house research and development facility with a qualified team, we design and develop several customized requirements for our valuable clients. We are looking for dealers and distributors for unrepresented regions across India to market our product range. We are also looking forward to explore export markets for which enquiries are solicited from our consultants.
