

Discover the 'Smart World' at IEW 2018

Smart is in. Be it the water-tap or your car, your telephone or your city—everything is getting smarter. But, what about your products? Is there a need to make them 'smart'? Or, are they smart enough? Can they become smarter? How can you and your team make them smarter? Can anyone help you make them smarter? Is it easy to make them in India? You can find answers to all

these questions at India Electronics Week (IEW). Since electronics and IT are key enablers of Smarter Products, IEW brings together five co-located events. These include expositions, conferences and workshops for business decision makers, as well as technical decision makers and influencers. Come and discover the 'Smart' world.
