

Are you looking for cost effective PCB Design software?...

Look no further, Pulsonix is the answer

- Fully Integrated Schematic Capture, PCB Design and 3D View
- Very easy to use and learn
- Seamlessly import design data from your existing CAD tool
- High-Speed board design with advanced constrain manager
- Reverse Engineer your designs from Gerber
- Technologies supported: blind/buried vias, Micro-vias (HDI)
- Support for Flexi-rigid boards
- Optional Spice A/D mixed mode simulation
