

BRIDGETHINGS IOT

BridgeThings IoT is a startup that builds solutions ranging from a simple AC-DC dual output SMPS (Brand: BT100, for powering IoT sensors to niche wireless lighting solutions that save up to 60% more power than a typical LED light. With patented technology that reduces power consumption of LED lighting based on different sensors, we believe in taking the LED lighting revolution to its next level. In addition to reducing power, our lighting solutions help our customers by cutting down the replacement cost & time by upto 70%.

With strong competency in power & mesh wireless networks, Bridge Things IoT has built a plug & play wireless hardware platform to enable students and the DIY community to prototype their ideas in no time. We believe in building solutions that brings efficiency in terms of cost & time.

CIRCUIT SYSTEM INDIA LTD. (PCB POWER MARKET)

With over 20 years of excellence, PCB Power has become one of India's leading PCB designers and manufacturers. Our focus on high-quality and economically viable systems combined with unmatched consistency has made us the firm of choice throughout India.

Our customers rely on us for their requirements in research & development, aerospace & defence, automotive, railways, medical, educational, telecommunication, industrial electronics and other critical areas of development.

With this value we are proud to launch the PCB Power Market. Be it design, customization or a component, the PCB Power Market has solutions for all like customized designs, PCB layouts, power stencils, soldering solutions, PCB fabrication, PCB assembly, heatsinks & mounting kits, thyristors & triacs, varistors, switches, capacitors, rectifiers, to thousands of small and large components that are required to build your state-of-the-art PCB. With everything under a single roof, the PCB Power Market is the first of its kind in India – one stop for infinite solutions.

We believe in providing solutions that meet the customers requirements. Cutting-edge High Frequency-RF metal clad PCBs, RT Duroid and Higher Layer count with lean manufacturing and SPC, are among our ground-breaking solutions, manufactured in our UL certified facility.

CLOUDTHAT TECHNOLOGIES

Incorporated in March 2012, CloudThat Technologies provides training and consulting services in Cloud, Big Data & IoT technologies for mid-market & enterprise clients around the world. With expertise in major cloud platforms including Amazon Web Services and Microsoft Azure we are the single technology source for organizations looking to utilize the flexibility and power Cloud Computing & IoT provides.

We are focused on empowering IT professionals and organizations with leveraging Cloud, Big Data & IoT. Co-founded by Bhavesh Goswami, an ex-Amazonian who was part of the AWS product development team and Himanshu Mody, who brings in 17 years of experience in IT Training and Consulting business allows us to deliver high quality training and consulting services with best practices.

We have trained more than 7,000 IT professionals and conducted corporate trainings for some of the fortune 500 companies which includes Accenture, Infosys, Fidelity, HCL, Intuit, GE, TCS, HP, SAP, Oracle, Western Union, Philips, Flipkart, I&T and Samsung etc.

We have presence in Bengaluru, Mumbai, USA & UK.

CloudThat is an AWS Consulting Partner, Microsoft Silver Learning Partner, Microsoft Server Cloud Platform Partner, Red Hat Certified Training Partner, MongoDB Ready Partner and part of Kryterion Testing Network.

CYRRUP

Our product "Vehicle Black Box" is for vehicles which works in similar fashion as in flight black box, with additional features to know the vehicle status, monitor its health, fuel levels, while providing safety and security of vehicle and its occupants.

It helps us to analyze the driver, how he is driving. With our data analytics reports, you can draw conclusions on his driving skills and your vehicles health. It also notifies instantly if your driver is taking sharp turns, jumping signals or ignoring signboards. Also, if driver is drunk beyond permissible level it will not allow him to drive. Panic buttons and push-to-call options comes handy in case of accidents to get instant help from our 24*7 call-center for ambulance or police help.

It has 2 cameras which track live footage of roads taken and inside the vehicle. These footage helps in insurance claims, false accuses or illegal blames. Our one of its kind visual analytics based solution, detects driver drowsiness while the vehicle is on the move. Additionally, we are developing an auto alert system meant for drivers, targeting heavy vehicles when moving vehicle in reverse. This is all-in-one system for complete vehicle management applicable for personal vehicles, fleet management or transportation management.

DIGI-KEY ELECTRONICS

Digi-Key Electronics, a global Internet-based distributor of electronic components, is an authorized distributor located in Thief River Falls, Minnesota, USA. By visiting our website engineers have access to more than 6 million components from 650+ trusted suppliers, with over 1.3 million products in stock and available for immediate shipment.

The company offers a vast selection of online resources including a range of EDA and design tools, reference design library, on-demand multimedia library, a comprehensive article library, and community forums, among others. Digi-Key also offers numerous Supply Chain solutions such as bonded inventory and just-in-time shipping, as well as a newly updated BOM manager.

Digi-Key prides itself on its ability to provide the best possible service to customers.

E CONTROL DEVICES

E Control Devices, established in 2012, is an ISO 9001:2015 organization having core expertise in Electronic component distribution.

We are a team of professionals having both business and technical expertise with a very structured operations and supply chain knowledge to shorten delivery time and meet customer wide requirements. We cater almost all the segments like Consumer Electronics, Automotive, Industrial, Defense, IoT, Lighting, Solar etc.

We source and stock broad range of electrical & electronic components like Relays, Connectors, Switches, Sensors, RF/Microwave Components, ICs, Mosfets, Analog devices, Bridges, Displays, Transducers, Sensors, Optocouplers, Fiber optic devices, Industrial automation, Instrumentation, IGBT, Thyristors, Rectifiers, Control systems, PLC & CNC parts, Drives, Servo motors, RF components, DMD chips, Process control equipment, Military components, Zigbee, Wi-Fi, Bluetooth components and Modules.

We also specialize in hard to find Components.
