

ELEMENT14 INDIA PVT. LTD.

Element14 is a leading distributor of electronic components, single board computers and development kits, tools, test and measurement, software and design services. We have out-performed the industry norms on parameters like availability of products, shipping speed and customer responsiveness. At a given time, we have more than 6,50,000 products like electronic components, Interconnect and e-mech products, electrical, tools and test and measurement from more than 3500 leading suppliers like Analog Devices, NXP, Molex, TE Connectivity, Microchip, Texas Instruments, Vishay, Fluke, Tektronix, Keysight etc that are in stock and ready to be shipped from our global warehouses. We also offer the first and only community www.element14.com for design engineers and electronics enthusiasts.

Area of Operations

Segments: Electronic components distribution

Products and Services: Semiconductors and ICs, Single Board Computers and Development kits, Interconnect and Passives, Electro Mechanical Products, Tools, Test and Measurement, Design Services, Softwares

Key focus areas: IOT, Prototyping

Parent Company Listing: NYSE

EMBDES TECHNOLOGIES PVT LTD

EmbDes Technologies, an engineering solution provider, founded in the year 2012 with offices in Bangalore and Chennai. EmbDes's focuses on providing solutions from the concept. The solution includes proof of concept, pilot production and mass production based on customer needs.

Our expertise: Firmware and Linux Device Drivers, Application Development - Android and iOS, FPGA - IP Core Development, Hardware Design, PCB Design, Thermal Analysis and Enclosure Design, Proto typing (PCB and 3D Printing), Mass production (PCB), Injection molding, Sheet metal works

EMS TECHNOLOGIES

EMS Technologies is an exclusive distributor for Lackwerke Peters, Germany and in India for the past 10 years.

Peters have manufacturing experience of more than 55 years in conformal coating, casting compounds and casting resins, and have presence in 65 countries.

In addition to this EMS Technologies has successfully diversified in the following related areas:

1. Supply & Manufacturing of ESD - Antistatic products
2. We are manufacturing customized Packing materials (Bubble Bag, Metal bag, VCI bag etc.)
3. We are specialized in Antistatic PET Tray for PCB's in electronic industry.

EMS Technologies has consolidated its role as a provider of complete "Conformal Coatings, Conformal Coating Job works & solutions, ESD-Antistatic products" and foraying into ancillary services related electronics.

FERRO STAR

Ferro Star was established with the aim of making quality ferrite components (Ferrite Cores & Phenolic Bobbins) for the Electronic Industry. Our motto is customers satisfaction through innovation & cost consciousness. Based on its wealth of experience and technical know how we are competent to design, develop & provide customized ferrite components as per customer's requirements at very competitive prices.

The company is marketing the products of Tongxiang Huayuan Electronic Co.LTD. in India. Presently the Company is dealing in Ferrite Cores i.e. EE/EC/EDR/EP/CF/ED/PQ/RM/ET/RING CORES/DRUM CORES/RODS etc. Ferro Star also deals in Iron Dust cores of various sizes.

GATIK GREENERGY PVT. LTD.

Gatik Greenergy provides wireless home automation products and solutions. Our products help in turning a home into a smarter and energy efficient one. With a combination of products from own stable and international brands, we enable one-touch operations, wireless and remote management of every aspect of a living space and make it smart.

Gatik Greenergy automation solutions can be used for surveillance, security, lighting, home appliances, energy management, home theatre and entertainment. The products can be retro fitted into any building thereby making it smarter at lowest possible investment. Greenergy's smart-home solutions come with built-in remote management capabilities via mobile app.

Part of Bangalore based multi-million dollar Gatik Group, which has interests in broadband, IT, technology, services and infrastructure, we are one of the few companies with own R & D wing and indigenously developed products.

GT MAGNETICS PVT LTD

GT Magnetics Pvt. Ltd is one of the leading manufacturers of wound magnetics, that has a wide range of coils and ferrite transformers. The company is ISO 9001:2008 certified. Its manufacturing unit was established in 1997 and since then, it has established a reputation for reliable quality and on time execution of orders.

Its major products include wound components for the lighting industry, LED driver transformers, solar lighting products, CFL driver transformers, wound components (for audio-video and automotive applications), inverter and UPS systems (for the telecom and charger industries), filter and choke coils and customised ferrite transformers and coils.

Apart from complying with customers requirements, our prime focus is to adhere to industry-defined quality standards for ferrite transformers, coils, SMPS, line filters, etc.

All its products and processes are in compliance with set standards and norms, as drafted by quality monitoring institutes. Equipped with a good infrastructure and a team of technical experts, the company's facility is spread across 139.35sqm of built area with 2322.57sqm of open space. The different types of machinery installed at its unit include a CNC automatic winding machine, an automatic core tapping machine, high-voltage breakdown testers, temperature-controlled ovens, etc.
