

HAPSTRONICS TECHNOLOGY PVT LTD

HAPSTRONICS Technology Pvt. Ltd, with headquarters in Bangalore provides superior Sales & Support in Electronic Design Automation and Printed Circuit Board industry, serving Hardware and Software markets.

HAPSTRONICS is authorized channel partner for – Pulsonix, Easy Pc, PCB Libraries, PCB Investigator tools. Industry-proven PCB design suites which provides a feature-rich, fully scalable solution that can be expanded and upgraded as PCB challenges and the level of design sophistication grows.

In order to meet the customer needs of our clients, HAPSTRONICS maintains a wide range of PCB design applications, exceptional functional and technical expertise coupled with extensive industry knowledge.

HAPSTRONICS goal is to exceed the expectations of every client by offering outstanding customer service, increase flexibility and greater value in PCB design environment. Our principals are distinguished by the functional and technical expertise combined with hands-on experience, thereby ensuring that our clients receive the most effective and professional support from us.

HARIHI OHM ELECTRONICS

HARIHI OHM ELECTRONICS is authorised distributor in India for M/s. DIGI INTERNATIONAL, USA (www.digi.com) for Zigbee/Xbee, WIFI, Cellular, IoT Gateways & Embedded SBCs and also distributor in India for M/s. AMPEDRF TECH INC., USA for Bluetooth Modules (www.ampedrftech.com) and we support all kind of Antennas for wireless.

HIMESH REDDIVARI TECHNOLOGIES

Module143.com is an e-commerce website under Himesh Reddivari Technologies Pvt. Ltd. A leading electronics and IoT company focussed on sales and service of electronic components for students and makers, which are used in their IoT, Embedded and Robotic projects. The company also conducts workshops on different platforms like Arduino, RaspberryPi, IoT, AI embedded systems, Robotics etc.

HK WENTWORTH (INDIA) PVT LTD

Electrolube has roots stretching back to 1941, when Henry Kingsbury formed Kingsbury Components to manufacture volume controls. It was here that Henry formulated a specialist oil that enhanced the electrical performance and lifetime of the contact surface in addition to reducing friction of moving parts.

This breakthrough prompted a range of contact lubricants, forming the basis of Electrolube. The company now offers thermal management materials, conformal coatings, encapsulation resins, cleaning solutions and maintenance products for the electronics industry.

With an expanding presence in 55 countries, Electrolube has a reputation for excellence. All our products range are manufactured at our factories in UK, China and India to ISO 9001, ISO 14001, IATF 16949 and OHSAS 18001 certification.

Unlike companies with standardised solutions that fail to meet the technical specifications required for your product, Electrolube's technical experts create customised solutions and support you from design through implementation and beyond.

HUMISEAL

Humiseal provides the wide selection of products to meet its customers tough environmental and chemical protection requirements for electronic circuits and systems. It manufactures over 60 electronics coatings, thinners, strippers and masking materials and can also offer custom formulations to meet unusual specifications. HumiSeal® products are qualified to MIL-I-46058C, UL746E and IPC-CC-830 standards. We offer production facilities certified to TS-16949. The standard demanded by the automotive industry.

The product portfolio is further enhanced by a range of complimentary materials that include Thermal management, Display adhesives, Damming & Potting materials, Conductive adhesives and Sealants.

Our approach to research and development is multi-faceted. The largest part is market-driven, listening to what our customers want and delivering against their expectations. At the same time, we are continually looking to the future and working to develop innovative new products. We have always been proactive regarding environmental issues and corporate responsibility. When it comes to protecting your electronics, it makes sense to trust HumiSeal.

IGNITARIUM TECHNOLOGY SOLUTIONS PRIVATE LIMITED

Ignitarium Technology Solutions is a silicon and embedded system solution provider that has offered cutting-edge engineering solutions in IC design, System design, Embedded software, Mobility software & Application development, ever since its inception in 2012.

Headquartered in Bangalore, with business entities in Kochi, San Jose, USA, Ignitarium embraces the significance of fire, by igniting, purifying, and refining ideas to produce technology-driven thought leadership, IP, solutions and services. We are core team of technologists, who have a collective industry experience of over 100 years, with expertise in IC design and implementation, FPGA design, Embedded system engineering and Software development.

Ignitarium's design service centre focuses on executing projects in VLSI and software domains. Design services include Semiconductor logic design and architecture, Design verification, FPGA prototyping, Embedded and Mobility software.

The key technology focus areas include computer vision, machine learning, deep learning, IOT and device mobility.
