

QUIKorrect – Static Servo Stabilizer

Technology transfer from MEDI

IGBT based PWM type STATIC VOLTAGE STABILIZER design

- No wear and tear like servo stabilizers
- No tap changing like SCR or relay based stabilizers
- 1% tight regulation
- 85V to 300V range possible
- Long life and low maintenance

Highlights of QUIKorrect

- * Instantaneous correction. Speed over 20000V per second
- * Discrete IGBT up to 30KVA single phase and 90KVA three phase
- * Single PCB for control stage, IGBT driver section and power stage.
- * Single contactor for three phase system
- * Single LCD for three phases
- * LCD will display all the phase voltage, connected load etc
- * Easy to assemble and low BOM
- * All protections included - low voltage, high voltage, overload and short circuit

For video demonstration, go to google / youtube and search "QUIKorrect"

For live demo, visit us at Stall #E30 at EFY Expo, 7th to 9th February, at KTPO Trade Center, Bangalore

**BOM of a 20KVA single phase QUIKorrect
Static Stabilizer with input range +/- 10% = Rs.12000**

Technology transfer up to 200KVA three phase – Rs.11,00,000
