

INDUS TECHNOLOGIES

Started in year 2008, Indus Technologies has grown in becoming one of the leading electronic component distributors in India having its registered office in Bangalore with a subsidiary company at Singapore. Indus has vast network of various electronic component manufacturers worldwide which covers most of the bill of materials and hence we can serve as ONE STOP SHOP for all electronic components needs.

We expertise in achieving bill of material cost reduction by suggesting equivalents for existing costly components which most of the time doesn't require re-design of the board.

We also have technical division which offers design solutions which can reduce customers time to market their products by directly incorporating Indus designs into their project.

We distribute below products from various manufacturers:

Active and Opto Electronic components – Discrete ICs, Diodes, Rectifiers, Transistors, MOSFETs, Thyristors, Regulators, LEDs, LCDs

Passive Components – Resistors, Capacitors, Inductors and Varistors

INFISWIFT

Infiswift is rethinking the enterprise-grade IoT platform. We help enterprises collect better data, make better decisions and streamline operations by providing the plumbing to connect and manage devices, users and cloud-based services. A unique architecture enables world-class security and scalability with a powerful developed environment and analytics front end for custom implementations. The ultra-lightweight design and extremely efficient operation make it ideal for intermittently connected and power deficient environments that require real-time operation.

IOP TECHNOLOGIES

IOP Technologies was established in 2011. We bring new technologies into market & have been developing platforms for Industrial IoT (Connected Factory), AI, Machine Learning, NLP chat bots for service, CRM software for sales, Service Request Management software. We have many satisfied customers across the globe including India, Australia, UK, Dubai, USA, Rwanda, etc.

Our vision is to bring global expertise, best quality solutions and innovations to the corporates, medium enterprises, public enterprises & governments. We address end-to-end requirements of customers through our products and solutions built and tested.

Our strengths:

We have dedicated and highly accomplished team with experience of working in corporates around the world. We have capability to cater to Industry 4.0 and connected factories.

The technologies we work on are IoT, AI, NLP, CRM, PHP, Python, Embedded, ASP.NET, Django, Node.js, JAL, Crypto currencies (Bitcoin/Ethereum), Cognitive bots, Java, Sparx Enterprise Architect, etc.

Products and Solutions:

IoT, Machine Learning & Analytics, Lead/Quotation Management, ERP, Service Ticket system, customer support cognitive agent, Service Request Management Software IOP Technologies LLP

JTK TECHNOLOGY INDIA PRIVATE LIMITED

We design & manufacture various kinds of inductors, electronic transformers, chokes, filters, inverters, and wire harness that are applied in lighting, green energy and home appliance industry.

JTK has established comprehensive quality control system. We are certified with ISO9001 and ISO14001, and are also certified in UL system, CQC and CEI certifications, which ensures our high standard quality product.

With outstanding management, we have sustained and supported many international electronic companies such as GE, Schneider, Samsung, Haier, GOODWE, DELTA and still expanding its customer group.

Contact details: No. 62, 4th Floor, Mahalakshmi Metal & Rolling Mills 3rd Cross, 1st Main, 2nd Stage, Yeshwanthpur Industrial suburb, Bangalore, PIN:- 560022 (KA, INDIA), www.jtkindia.com

KARNATAKA BIOTECHNOLOGY AND INFORMATION TECHNOLOGY SERVICES (KBITS)

It is the nodal agency of the Department of IT and BT, Government of Karnataka and a single point contact for investors in IT, BT, ESDM, AVGC and Startup sectors. It coordinates the conduct of the department's flagship annual events like Bangalore ITbiz, Bangalore India Bio, Bangalore India Nano and the annual AVGC Event, GAFX.

We provide various incentives and concessions to the IT, Biotechnology, AVGC, Startup and ESDM sectors under the various schemes and policies of the Government.

The implementing agency for the Bangalore Biotech Park & the proposed Biotech Parks in Tier II cities. We provide assistance to delegations and dignitaries who visit the State and disseminates information about the various opportunities available for investments in the IT, BT, AVGC, Startup and ESDM sectors in the State.

KEETRONICS (INDIA) PVT LTD

Keetronics (India) Pvt. Ltd is a fast growing company specializing in manufacturing Advance Input Devices, Functional Printed Electronics and Touch Electrical Switches products for the past 25 years.

Keetronics products are widely used in most of the Electronics equipments in different segments, for example, an X-Ray machine or a Baby warmer is having an input device made by KIPL.

Other applications includes a Toll collection devices on the highways, a process control panel in a petroleum refinery or a fault diagnostic panel in a railway engine cabin requires a user interface, which we produce.

Keetronics is focusing on the new product called "Touchmatik", which is a Touch Electrical Switch, replacement to the switches used in our house, offices and hotels.

Since 2012 Keetronics has diversified into manufacturing of product related to a new field called Functional Printed Electronics. We at Keetronics are taking great efforts to build a setup to produce Printed LEDs, Printed Sensors, Printed Batteries and many more products, which are cost effective, biodegradable.

Keetronics is investing heavily in technology, human resource and infrastructure, to cope up with the rapid growth which is expected from the new segments introduced by the company.
