

MARTIN

Martin's Electronic Devices & Instruments (MEDI) is an R&D firm involved in the design and development of electronic products for industrial and commercial applications. Established in the year 1987, the main focus was to provide cutting edge technologies to manufacturers looking for advanced technologies.

MEDI is involved purely into Research & Development in electronics – both hardware and software. The main field of MEDI is development of new innovative electronic products and transferring the technology to manufacturers.

"QUIKCorrect" Static Voltage Stabilizer is our latest innovation in the field of static servo. With correction speed over 20000V per second, no wear and tear due to the absence of any moving part, wide input range of 85V to 300V with constant output of 230V +/-1%, this is the future of stabilizers which will replace the existing slow CVTs, SCR tap changing type and conventional bulky servo stabilizers.

MATRIOT SOLUTIONS PRIVATE LIMITED

Matriot Solutions Private Limited, an Industrial & Environmental IoT startup founded in 2017 specialises in Smart Kanban and RFID based Asset Tracking & RTLS solutions.

Matriot's cBin provides a smart kanban system with the use of hardware (Sensors & devices) and software that enable the industries to take control of C-Parts inventory and replenishment orders with features such as Mobile alerts, Inbuilt analytical engine, API integration with ERP system. Matriot's Asset Tracker enables to access, manage and monitor your mission critical assets with the use of RFID, sensors with RTLS (Real-time location services) solution.

Matriot products are built on our innovative, technology driven platform – M3 Platform (Matriot Machine-to-Machine) design based on a scalable, robust, layered API driven architecture that enables the device to be managed, monitored, data generated/collected and controlled by the application layer.

Our Products (powered with our innovative, robust M3 Platform) are:

- cBin – cloud-based C-class Kanban System
- AssetTracker – RFID & sensor-based asset-management RTLS solution
- Spotter – Network-Performance-Management & Bandwidth monitoring solution
- cWeather – cloud-based Weather station

MECTRONICS MARKETING SERVICES

Mectronics Marketing Services is a leading name in the Indian electronics manufacturing industry for its high quality PCB assembly consumables and equipment. Since the last 23 years, the company has been serving the market with a team of experienced and qualified engineers. Mectronics has six offices in Delhi, Bengaluru, Chennai, Hyderabad and Pune. Its Noida-SEZ warehouse is for ex-stock, zero duty inventory and for exports. The consumables it deals in are: SMT adhesives, solder pastes, conformal coatings, cleaning chemicals, reflow profilers, pick-and-place (nozzles, feeders, spares), splice tapes, metal squeegees and blades, electronic screwdrivers, dispensing cartridges and needles, clean room wipes, complete range of ESD products, etc. The equipment it deals in includes paste printers, PCB and stencil cleaning machines, spray fluxers, BGA inspection systems, conformal coating systems, reflow ovens, BGA rework systems, wave soldering machines, manual and robotic glue dispensers, screw driving machines, component counters, reflow process inspection systems, etc. The company's main principals are Heraeus, Zestron, Humisil, Metcal, Techcon, Sudong Hanwha, PBT, etc.

MOUSER ELECTRONICS

Mouser Electronics, a Berkshire Hathaway company, is an award-winning, authorized semiconductor and electronic component distributor focused on rapid New Product Introductions from its manufacturing partners for electronic design engineers and buyers. The global distributor's website, Mouser.com, is available in multiple languages and currencies and features more than 4 million products from over 600 manufacturers. Mouser offers 22 support locations around the world to provide best-in-class customer service and ships globally to over 550,000 customers in 170 countries from its 750,000 sq. ft. state-of-the-art facility south of Dallas, Texas.

With its broad product line and unsurpassed customer service, Mouser strives to empower innovation among design engineers and buyers by delivering advanced technologies. Mouser stocks the world's widest selection of the latest semiconductors and electronic components for the newest design projects. Mouser Electronics' website is continually updated and offers advanced search methods to help customers quickly locate inventory. Mouser.com also houses data sheets, supplier-specific reference designs, application notes, technical design information, and engineering tools.

MUKTA NK TECH PVT. LTD

Mukta NK Tech Pvt. Ltd. (MNNK) is primarily focused on design, development & manufacturing of LED lighting products with an additional value of bringing a flair of technology in it.

In a short time we have introduced WIFI & Sub-GHz Based street light automation, BLE based bulb control, Emergency smart LED Bulb/Tubelight and few more Tech stuff in pipeline to be launched. To sustain in Competitive Indian Market, our focus is to bring a product at a fair price with exceptional quality. This helps our clients to bring customer loyalty, build brand at almost null maintenance/service costs, post-sales.

We are expanding export market as well. If you are looking for Nex-Gen Products in lighting solutions, you should visit us.

PHYTEC EMBEDDED PVT. LTD.

Established in 1986, PHYTEC a German based mother board manufacturing company, has evolved into one of the leading manufacturers for ARM based System on Modules (SoM) or Computer on Modules (CoM) and Single Board Computers (SBC). PHYTEC also offers Internet of Things solutions, Product solutions, Embedded Imaging as well as Hardware specific software.

In addition to the in-house production at global Headquarters in Germany, PHYTEC has Global corporations with 4 subsidiaries along with 8 distribution offices with more than 200 Employees. PHYTEC market reach spans across many countries around the globe from United States, France, India and China.

PHYTEC solutions have been deployed in thousands of systems across a wide range of industries and applications, such as control and automation, medical, test and measurement, automotive, energy and transportation. Typical series production quantities range between 100 and several tons of thousands of products per year. PHYTEC provide end to end solutions for companies seeking full product development support from a single source, enabling them to shorten time-to-market, reduce development costs and avoid substantial design risk in bringing products to market.
