

PULSAR ENTERPRISES P LTD

We are engaged in the manufacturing of LED drivers from 8W to 100W with highest standards of safety with one of the minimum failure ratio in the industry. Pulsar being promoted and managed by qualified engineers have the vision to maximize the profitability of their buyers by minimizing their rejection ratio of luminaries from the field. Pulsar has manufacturing facility at Mumbai since 2011.

RAJGURU ELECTRONICS

"RajGuru Electronics", is one of the leading suppliers and traders of Active and Passive Components, Sensors, Switches, Wireless Modules, Robotics Products, Engineer Students Project Items, Development Board, Modems and Modules. In our range of production process, we offer a wide variety of Photo Coupler, Micro-Controller, Regulators, Gas Sensor, GSM/GPRS Modem, GPS Modem, Xbee Modules, RF ID Reader Module, Humidity Sensor, Friendly Arm Board, Blue Tooth Modem, Finger Print Module, Smart Card Reader, Bar Code Reader, Gear Motor, Servo Motor, etc. Our products are widely known for its long-lasting nature, reliability, ease of operation and robust construction.

We have a highly qualified sales and logistic team. In addition, our vast distribution network is helpful in providing the qualitative and flawless range of products without any compromise with the quality. Our products are widely known and appreciated for ease of installation, durability, ease of operation and reliability.

Under the guidance of our mentor, 'Mr. Rajesh Jogan' (CEO), we have been able to provide our qualitative range of products to our esteemed clients. His continuous motivation has been helpful in creating our goodwill in the global market.

RESONANT

Incorporated in 2010, we are manufacturing, supplying and wholesaling the Queue management, School automation Systems, Water Vending Control Panels and Industrial Control system. We provide the latest and advantageous products to our customers. Our range of products are well-appreciated among the customers for their compact design and high performance.

We have divided the infrastructure in various units. At manufacturing unit, we have installed the latest machinery and facilities to handle the manufacturing process. After being manufactured, these products undergo various quality checks.

Following Products are Manufactured and Sold across India through our wide dealer Network

- Queue Management Systems:** (a). Basic Token Display, (b). Token Display with Printer, (c) Multi Counter Token Display System
- School Automation Solutions:** (a) Automatic School Bell, (b) RFID Attendance Monitor, (c) School Bus GPS
- Water Vending Controllers:** (a) Single Channel Only Coin Vending, (b) Multi Channel Only Coin Vending, (c) Multi Channel Card & Coin Vending, (d) GSM Based Multi Channel Card & Coin Vending
- Industrial Solutions:** (a) Counter Meter, (b) DC to DC Converter, (c) Countdown Timer, (d) Safety Light Curtains, (e) Turnstile Gate Controller

REVE AUTOMATION

REVE AUTOMATION is an IoT (Internet of Things) Product Development company with an experience of over 100 years and have developed Car and road sensors, Track & trace system (School, Industry), Industrial vibration sensor, Safety and rescue technology for Hazardous Industries, Smart city solutions, Sensors for smart farming, etc.

Reve Vision is to become 1st Hardware accelerator in India to help start-ups, researchers and companies to design solutions for IIOT, Health Care, Agro & farming and Smart Security for Home & Offices.

Technology: Protocol Converter, Heating/ Cooling using Solid State Technology, Smart Lab, Soil Sensors, Wireless Sensor Network, Beacon Based Solutions, Achievement, Human & Asset management system using beacon based technology, Tunnel Light management System, Grid Power Monitoring System, Street Light Poll Tilt Sensing for GIFT City, Gandhinagar, Traffic and vehicle Monitoring, Industrial Panel for IoT based Controls and Automation, Sensor Network for CEPT, Ahmadabad, Environment Sensor (Temperature, Humidity Co2, PM 1, PM 2.5, PM 10 Monitoring)

ROYAL ELEGANCE TECHNOLOGIES PVT LTD

"Royal Elegance Technologies Pvt. Ltd, established in 2014 is a private Indian firm based in Bangalore. Royal Elegance Technologies Pvt. Ltd was formed for the purpose of offering software and hardware development services to the high technology industry.

We provide cost effective and innovative embedded systems solutions to business, including both hardware design and software development, with expertise covering many processors/micro controllers and real time operating systems. The company relies heavily on innovation and cutting-edge technologies to provide a wide spectrum of reliable hardware solutions and applications. Elegance Technologies operates with a roster of independent consultants that are retained on a project by project basis.

Our Vision: RET would like to be a major actor in the Embedded Systems service industry, dealing with several OEM's & their Tier 1 Suppliers.

Our Mission: RET is committed to deliver high quality & Cost effective engineering design services to leading edge technology providers.
