

RS COMPONENTS

RS Components is the world's leading high service distributor of electronics and maintenance products. The group serves 1.8 million customers worldwide. Its product and service portfolio supports the entire product lifecycle from R&D through pre-production to maintenance and repair, with 6,50,000 products from 2500 leading suppliers, ranging from semiconductors and optoelectronics to power tools and protective clothing.

RS India has always been at the forefront of high service distribution in the Indian market. Its electronics portfolio incorporates semiconductors, passive and electromechanical components, test and measurement equipment and the tools needed to support every design engineers job.

RS Components has been supporting engineers around the world with the latest of technologies including Raspberry Pi, Development boards & other products to enable a true IoT environment. We've been stocking products to support EDE's Internet of Things product innovations.

DesignSpark.com has been another innovation from RS Components that supports the engineers with FREE PCB designing software, FREE 3D modelling software and a complete suite of FREE technical software's.

With over 5000 new products introduced online each month, we currently offer 6.5 lakh products from over 2500 brands.

SEMIKART

Semikart.com is a first of its kind dedicated online marketplace for Electronics Components and Allied Engineering services/ products, where customers can search, compare & place the order for electronics components and allied engineering services. Semikart is engineered to simplify the process of sourcing/manufacturing of electronic products for SME industries to reach out the demanding "Time-to-Market" and "Time-to-Launch" challenges. Our Objective is to build the ecosystem around silicon with the participation of multiple vendors across the industry.

We being the demand creation marketplace, shall work as an extended sales arm of the company to promote your products through online & offline sales activities, which helps to get an incremental sales.

TECHNO SPHERE INC

TechnoSphere Inc., located in Bengaluru, Karnataka, provide complete product life cycle support in terms of Product Design, Assembly, Manufacturing and Testing. The company has developed an excellent range of products since it commenced operations in 2012 and our vision is to be one of the most preferred companies for Design and Development in Electronics Industry.

Area of Operations:

Design and Development (Embedded systems, Power Electronics), Transfer of Technology, PCB Layout Design, Turnkey Manufacturing Electronic Manufacturing Service (EMS).

Products and Services:

Design and Development, PCB Layout Design, Electronic Manufacturing Service (EMS)
