

TRANSFER MULTISORT ELEKTRONIK

TME is a family company created in 1990 in Łódź (Poland). It evolved from a small shop that offered electronic components for service and small production purposes.

Currently, we are one of the biggest global distributors of electronic, electromechanical, industrial automatic components as well as workplace equipment. The company employs more than 600 employees in its headquarters in Poland and subsidiaries in other countries.

TME supplies almost 100,000 companies in over 130 countries and sends 3700 packages a day. Among 200,000 products in our offer, you will find goods manufactured by the majority of significant electronic component producers.

The development of the company triggered the continuous process of opening new foreign TME subsidiaries in UK, Italy and many more.

UCHI EMBEDDED SOLUTIONS

Uchi Embedded Solutions works in the field of embedded system development tool. It provides tools and solutions right from the design, testing and production of embedded electronics products. The company aims to bring out quality products at affordable prices. It offers its clients an entirely new experience because it deals with customers like a consultant rather than a sales manager. It suggests the right solutions with risk free terms like pre-sales demos, pre-sales evaluation, payment credits, buy-back policies, etc. With these policies, customers are happy to buy more whenever there is an opportunity. Its tagline is 'Customer oriented- Technically inclined'.

UNISEM ELECTRONICS PVT. LTD.

Unisem represents as leading global component manufacturers. At Unisem designers help build POCs for new products. At Unisem we offer value added services such as Just-in-Time (JIT), custom design capabilities, assembly and kitting and engineering services. We represent the world renowned capacitor manufacturer - Cornell Dubilier- Illinois Cap from USA. CDE specializes in capacitors for segments like Renewable Energy, Audio Amplifiers, Power Transmission, Lighting, Communications, Medical Power, Automobile, Military & Aerospace etc. We have successfully developed various solutions in the telematics / IOT space. We are active in the IOT space by supporting our customers with SIMCOM GSM, GPS and GPRS modules and helping them in their design activities by designing end applications for them. As a mark of embracing new technologies Unisem has recently got India distribution rights for Lora modules & Lora network products & is active in promoting Lora technology.

Area of Operations: Electronic and electromechanical components

Segments: IOT, Telecom, Automation, Power electronics, LED

Products and Services: Electronic component distribution & Electronic product design services

Key focus areas / Emerging trends / Latest developments in the company: Telematics, Tracking, Lora, LED Driver solution

V5 SEMICONDUCTORS

Indian based Semiconductors & Electronics Distribution and Design Services company established in the year 2013 with 40+ years of overall experience is located at Bengaluru & Hyderabad. With its enthusiastic team capable of achieving high standards of industry competency and experience helps customers integrate cutting edge technology to streamline their design processes and increase productivity, thus shortening their design cycle and taking much closer to meet time-to-market schedules. Serving semiconductor OEMS/ODMs/IDH since inception. A focused sales, marketing & application team is addressing Electronics System Design & Manufacturing - ESDM eco system as a Reliable partner with key offerings such as: Distribution Services, Warehouse & Fulfillment Services, PCB Design Services, Electronic Manufacturing Services & Turnkey Solution services.

WAFER SPACE

Wafer Space is an engineering solutions company focused in Semiconductor and Embedded Systems. Our strength is our world-class engineering team combined with the ability to execute complete projects in a turnkey mode.

In Semiconductor, we have experience in digital and analog design. We have excellent capabilities to execute semiconductor projects from RTL to GDS II.

In Embedded, we have hardware, software and systems expertise to build complete Embedded systems from specification. Our domain expertise spans Automotive, Industrial Automation, IOT, Smart Home, Wireless, Storage, Networking and others.
