

Portable Wireless Speaker

With RGB LED lights

Whether it is a house party or a road trip, Zebronics' latest Buddy speaker is the perfect way to chill. This light-weight and portable wireless speaker weighs just 630gm, making it easier to carry around anywhere and everywhere.

Ergonomically designed, the speaker sports an LED display along with RGB LED

light. With 5W RMS output and carry handle for easier portability, it won't disappoint you even outdoors. The speaker runs on a built-in rechargeable battery for up to three hours of music and offers Bluetooth wireless connection. The built-in FM lets you enjoy live streaming music anywhere. Multiple connectivity options like USB, MicroSD and AUX make listening to music easier.

Smart phonebook app that auto-updates itself

SharkID, a joint venture between e-Procurement Technologies and Silver Touch Technologies, has launched a smart phonebook app that auto updates itself and focuses on creating digital card format of contacts. Users need to register with mobile number (verified through OTP) and fill in multiple contact fields to create their personal card, which is private by default. Next time you call/receive a call from unknown number, SharkID will tell you who is calling and how many of your friends know him. Know who all have saved your number and remove your number from a stranger's smart phonebook.

Android Oreo Go for low-end phones launched

Google has announced Android Go—an operating system optimised for low-end hardware (featuring smaller RAM such as 512MB to 1GB). Enhancements for speed and reliability allow an average app to run 15 per cent faster on Go devices. Meanwhile, pre-installed apps have been slimmed down and take up 50 per cent less space, thus doubling the amount of available storage on entry-level devices. On the data front, various data saver features in apps — like Chrome — are enabled by default, while Android Go includes stricter data management. A built-in data usage tool lets users control which apps can use background data.

Photo-editing software update released

Anthropics Technology has released PortraitPro Body 2—a standalone full body retouching software and plugin for Adobe Photoshop, Lightroom and Elements. Version 2 offers Warp Fixer controls, Photoshop Smart Filter, Lite Mode and is said to be the fastest and most accurate PortraitPro Body ever. It promises to reshape and contour images within minutes. The software is trained to recognise characteristics associated with human beauty. It can airbrush away flaws and dramatically slim down the whole body in seconds.
