

The first classified and documented car that claimed a supercar status was introduced in the year 1909. Named Blitzen, which meant 'lightning,' it came from the Benz stable. Its 200HP, 21.5-litre engine produced a top speed of 142 miles per hour (mph), which was twice as fast as the aeroplanes' at that time!

And now we have the Hennessey Venom F5 at 301mph, a 1600HP beast, claimed to be the fastest in the world, post its official launch at SEMA 2017 at Las Vegas in the USA. I call it Insane, but that's what the car's designers would like to get called - people who are speed-savvy and torque-maniacs!

Word is going around that John Hennessey is slated to do cherry picking for V5 owners himself. That's a long haul for aspiring owners if they are looking at V5 to stand tall in their Portico.

It is generally believed that the first supercar that came in folklore was the mid-engine V12. Extremely stylish, the 170mph+ Lamborghini Miura - the Italian star - blew away the world

Bugatti Veyron

“SUPERCARS HAVE BEEN IN VOGUE FOR MORE THAN HALF A CENTURY, BUT NOW THESE ARE FINDING THEIR REAL STEAM WITH THE EVOLUTION OF POWER, STEALTH AND SPEED ENGINES TO COMPLIMENT THEIR STATURE.”

Wire Wound Resistors (WWR)

Small dimension, excellent stability in high temperature, resistant to humidity and comparatively than other kind of resistor. Fabricated using a suitable fiberglass or ceramic core with resistance wire securely crimped to the terminals. Precise resistance value with better life proof. Super heat dissipation, small linear temperature coefficient. Instant over load capability, low noise figure and without annual shift on resistance value.

Metal Glazed Resistors (MGR)

Provide high stable performance against environmental conditions & overload voltages.

Manufacturers of

- CFR • MFR • MOR • MGR
- WWR • Fusible Resistors
- High Power Resistors
- Aluminium Housed Breaking Resistors

Some of our segments we actively deal

1. Automobile
2. Lighting
3. Power Industry
4. Electrical Industry
5. Instrumentation
6. Consumer Industry & Others
