

Smart lighting

While smart switches help you turn the lights on and off remotely, there are lot many other lighting features required to create the best home ambience. These additional features could be auto-dimming, colour control and ambience effects among others. But for these features you need the lighting itself to be smart.

Smart bulbs are usually paired with a smartphone via Bluetooth and controlled by a mobile application. The application helps you to decide the brightness as well as the colour of lamp's light. Many light bulbs also have the intelligence to auto-customise with other external factors like audio or music.

Smart bulbs cost ₹ 1000 onwards depending on features like voice command, IFTTT support and so on. Syska offers Smartlight Rainbow LED bulb at Rs 1500. TP-Link has its own range of smart bulbs costing around ₹ 2500. Xiaomi's smart Yeelight LED costs ₹ 2000.

Newer players who are innovating in India also offer some commendable options. For instance, Delhi-based Cube-26's Reos Lite smart bulbs cost ₹ 1300. Gurgaon-based Mansaa's Smartshine smart bulbs are priced at Rs 1800. And of course, there is Philips Hue, which costs much higher.

Smart Locks

Doorlocks are also going digital. These are mobile-activated and provide absolute security due to their sturdy and reliable designs. You can automatically lock the doors when you leave home and open them with a touch on your mobile screen. So, if you are at work and your parents come down to meet you at home, you can remotely unlock doors of your house using the mobile application to let them in.

Some smart locks also come with two-way audio and video interface. Answer your door using your smartphone or watch the real-time video of your doorstep while you are inside or even far away. Yet, apart from all the advanced features, smart locks give you the flexibility to open them even with their traditional keys.

Some popular smart locks include Yale's YDR3110 available for about ₹ 15,000, August's Smart Lock for ₹ 19,000 or Samsung's digital lock for about ₹ 20,000.

Wireless security cameras

Wireless security cameras allow you to watch the inside and outside of your home from any Internet-connected device. These have in-built intelligence to record video footage whenever there is motion within the covered area, which can be viewed in real time on a smartphone.

You can check live streams at your own convenience as well. Video footages can be stored in cloud servers and accessed from anywhere. Additionally, many cameras come with two-way voice interaction feature, which lets you talk to the person at the other end using the smartphone. All this is driven by mobile applications.

Some products that you can explore in the market are D3D Fisheye Vision for ₹ 4000, Sricam SP005 for ₹ 3000 and YI home camera starting from ₹ 2000. **EFY**
