

AHEAD OF WHAT'S POSSIBLE™

ANALOG DEVICES AND
NATIONAL INSTRUMENTS
ARE USHERING IN
TOMORROW'S 5G
STANDARDS, TODAY.

Tens of thousands of devices streaming live content from an event. Download speeds approaching 10,000 Mbps. All of this and more is possible with the coming of 5G – and National Instruments' second-generation Vector Signal Transceiver is enabling that future, with solutions and support from Analog Devices.

INSTRUMENTING A 5G FUTURE.
