

Do you have the right middleware for IoT?

Tradition middleware cannot support IoT requirements.

PaaS solutions can support IoT but lack the flexibility that may be required.

Open Source IoT solutions are an ideal option but most businesses may not have the internal expertise to leverage.

For developing IoT solutions that requires:

Relevance

Cost
Effectiveness

Flexibility

Data
Ownership

Speed of
Deployment

Think **Nebulae**, Think **Possibilities!**

Nebulae.io

An IoT solution that provides you the seamless capability and flexibility of an advanced IoT Middleware.
