Smart TVs

Perfectly mastered fine details in darkness and in light

Sony's X9000F series features the latest processor and picture quality technologies for ultra-realistic 4K HDR TV entertainment. 4K HDR processor X1 Extreme includes powerful real-time image processing for ultra-detailed pictures. With up to six times the contrast of conventional LED TVs, these 4K HDR TVs with X-tended Dynamic Range PRO ensure dark scenes are darker and bright scenes brighter.

X-Motion Clarity technology keeps fast action smooth and clear. Moving images are precisely controlled to minimise blur. Pictures stay true with no loss in brightness even during high-speed scenes. The TVs can handle a variety of HDR formats, including HDR10, Hybrid Log-Gamma and Dolby Vision.

Sony's new range of smart TVs lets you enjoy many of your favourite smartphone and tablet experiences on a big

Bravia screen. The Android TVs with advanced voice control let you connect and access content, from movies and TV shows to thousands of apps, simply by talking. The 4K HDR TVs are also perfect for PlayStation 4 and PlayStation 4 Pro consoles.

Headphones

Optimised for comfort and convenience

The gaming division of Kingston Technology, HyperX has launched its HyperX Cloud Stinger Core gaming headset in India. An affordable headset, it is designed for console gamers looking for great sound at a value price. It features an adjustable steel slider and soft ear cushions for comfort along with a swivelling mic. The headset comes with directional 40mm drivers for an immersive in-game audio experience. It is backed by a two-year warranty and free tech support.

HyperX Cloud Stinger Core weighs 215 grams. It is multi-console compatible and has convenient audio controls directly on the cable. Its closed-cup design helps block out distractions and provides a more accurate in-game sound.

Wi-Fi system

Next-generation Wi-Fi for a smart home

D-Link has launched its next-generation Covr dual-band whole home Wi-Fi solution (COVR-C1203) powered by Qualcomm Mesh Networking Platform. With a pack of three Covr Points, the system gives Wi-Fi coverage up to 465sqm (5000-sqft). Covr Wi-Fi system provides performance and connectivity needed to support many connected devices at one time.

Featuring MU-MIMO technology for higher and more efficient throughput, 1200AC Covr virtually eliminates Wi-Fi dead-spots and creates a zone of dedicated high-speed, seamless Wi-Fi for a smart home. It is ideal for enjoying bandwidth-hungry multimedia applications throughout the house, without loss of performance.

To help ensure that connectivity is never compromised, D-Link has implemented smart roaming technology in Covr. Smart roaming continually analyses the wireless signal strength between devices, helping to automatically connect these to Covr Points with the strongest Wi-Fi signal.

The effortless plug-and-play setup through either D-Link Wi-Fi app or Web-based interface means you do not have to know your bits from your bytes to enjoy seamless, comprehensive and reliable Wi-Fi in your home.
