

Speaker

Combining vintage with modern

Extending its line of audio, QHMPL has launched its first Bluetooth speaker QHM 6333, which combines vintage box looks with modern sound. It is a perfect addition to a retro setup at home.

With conventional speakers, stereo sound can be heard in only a few sweet spots. However, with BT 8000, the speaker includes precisely-positioned drivers to provide a large, consistent sound field for outdoor listening. With dual-mode power supply, outdoor mode provides bright, long-range audio, while indoor mode creates rich sound with deep, full-bass delivering full frequency range. This is suitable for all genres of music and, in turn, a lush, optimal sound.

The speaker with 10 metres range is fully wireless. It features an enhanced bass driver that delivers rich, balanced lows without muddying the highs. It comes with 12-hour playtime with rechargeable 2000mAh battery.

Portable projector

For entertainment on-the-go

ViewSonic's M1 ultra-portable LED projector with built-in dual Harman Kardon speakers is ideal for sharing instant multimedia. The projector displays convenient entertainment in just about any room at home and while travelling. Professionals can share multimedia on-the-go with a built-in battery that provides up to six hours of power, 16GB of built-in memory and LED technology that offers up to 30,000 hours of usage.

Compact and lightweight, M1 weighs about 680 grams. This makes it easy to carry from room-to-room (in any indoor) environment, or on the road. Featuring 250 ANSI lumens of brightness, M1 is engineered with a 120,000:1 contrast ratio, as well as a short-throw lens that can display large images in small spaces. The projector comes with multiple connectivity options including HDMI, USB 2.0 and USB Type C, Audio Out and microSD card reader, making it easy to share and view a variety of multimedia content.

Price
₹ 49,000

M1 utilises the latest solid-state LED technology, which makes it mercury and lamp free. With support for full-HD (1080p) resolution, M1 is 3D compatible with optional PGD-350 3D glasses. The integrated, patent-pending smart stand provides for simple setup, allowing the projector to be placed in different positions at nearly any angle, while also doubling as a lens cover. When the lens is uncovered, M1 automatically powers on with full brightness for instant use. A built-in safety feature temporarily turns off the lens when objects are detected too close to the projector.

Power bank

Especially made in and for India

Ambrane India has announced its latest 10,000mAh, PP10 power bank. The power bank's high-power capacity is great for charging multiple devices, especially considering its two USB charging ports. The device offers a conversion rate of 80 per cent. It automatically adjusts output based on the attached device. The power bank can cater to 500 power cycles in its lifetime.

Plush PP10 features a digital charging display that accurately displays the status of charge left in the power bank. It is fabricated with superior-quality polymer battery. Built with ABS body, its sturdy and lightweight design makes it easy to carry anywhere.

With nine layers of advanced chipset protection and quality polymer cells, the BIS-certified power bank features a horde of advanced safety features including short-circuit protection, over-charge and over-discharge protection, and over-voltage protection. This assures maximum user and device safety at all times.
