

Feature phones

With multi-language support

Ziox Mobiles unveils X7 and X3 feature phones at budgeted prices. Stylish and functional, the devices have a comfortable grip that allows convenient one-hand operation. With 4.6cm (1.8-inch) display, both feature phones—X7 and X3—brings perfect viewing from any angle. The phones come with a rear camera with flash, that lets both dual-SIM devices operate even in low-light conditions.

The phones also feature auto-call-recording facility. These are enabled with Bluetooth and GPRS, along with easy access to the Internet. With a powerful battery of 1000mAh in X7 and 800mAh in X3, the dual-SIM devices ensure lasting entertainment.

Additional features include wireless FM radio, LED torch, mobile tracker and several pre-loaded games. The phones come with multi-language support.

Security camera

Providing 360-degree wide coverage

iBall has introduced a panoramic camera equipped with fish-eye lens, with an aim to revolutionise the CCTV landscape for entry-level and SOHO requirements. The camera offers eagle's view that brings 360-degree coverage with 1.44mm super-wide lens, which allows no details to escape. This innovative fish-eye camera offers an interactive 3D panoramic view to keep an eye on every corner. Every angle can be monitored with multi-views and zoomed in and out of visuals in various modes such as fish-eye, cylindrical, grid, tile, split and top.

The camera's 2MP performance gives superior-quality images. Three mini Matrix IR LEDs have been fitted to assure visibility and clarity, even in

low-light and dark conditions. Its H.264 video compression feature compresses videos seamlessly, saving a lot of space. With microSD support of up to 64GB, the camera can store bountiful of data.

You can view all the happenings directly on your smartphone or tablet. The camera is engineered for easy installation and configuration. Tiny and discrete in design, it occupies the least space and blends with the surroundings well. The fish-eye camera brings in two-way live audio conversation, and motion-based alarm that registers every motion and immediately triggers the alarm, notifying you on your smartphone.

TRAI launches three apps

Telecom Regulatory Authority of India (TRAI) has launched three apps to help customers rate quality of services, speed and performance. Mycall, MySpeed and Do Not Disturb (DND 2.0) are being launched to ensure more transparency between consumers and service providers.

MyCall is an Android app for crowdsourced voice call quality monitoring. The app will help users to rate their experience about voice call quality in real time and help TRAI gather customer experience data along with network data. Callers can also provide details like noise or audio delay or mark a call-drop, if they believe that is how the call got terminated.

MySpeed will enable TRAI to obtain test data from users in all service areas, without any action by the users. Crowdsourced data so collected can be viewed in aggregated form on the interactive map-based portal.

DND service app will enable users to register their mobile number under DND to

avoid unsolicited commercial communication, telemarketing calls and SMSes.

Datally for saving mobile data

Alphabet's Google has introduced Datally, an app designed to help Android smartphone users stay under the limits of pricey mobile data packages in developing countries. The new service lists data consumption by different apps and enables users to shut off data transmissions by apps of their choosing. It also provides a directory of nearby Wi-Fi networks that includes user commentary on quality.

Flochat, India's first multi-messenger app

Flochat, India's first multi-messenger app, fosters connections and conversations through its multimedia instant messenger. It allows users to take and share photographs with others at different locations on real-time basis. It aims to make lifestyle services easily accessible, by integrating apps such as Zomato, DineOut, Ola, Uber, Microsoft Bing, Coupon Duniya, BookMyShow and YouTube. The app is compatible with Android and iOS, and is available for free.
