Digital payment methods have become a preferred choice in almost any purchases we make nowadays. Thanks to the governments' Digital India drive, various payment applications have been made available to ensure safe, secure and well-documented transactions. In this article we look at some popular apps that can make our transactions easier. It is important to note that all payment-related applications will require updated KYC details, so keep your Aadhaar Card, PAN Card and other eligible IDs ready before installing these programs.

PhonePe

PhonePe payment app provides the benefits of multiple payment methods, including direct bank transfers, Unified Payments Interface (UPI) transactions, e-wallet recharges, debit or credit card-based transactions. You can link your bank accounts for transferring money.

The application can be used for various utility bill payments (electricity, water, cable, broadband, etc), mobile recharges, insurance payments, credit card payments and so on. It can also be used to check the balance(s) in linked bank accounts.

The app's Scan and

Pay option provides two modes of fund transfers, especially at retail outlets. One is by scanning QR codes and the other is called POS transfer. POS transfer can be used if the retailer has a PhonePe POS machine, where the purchaser's (in this case you) smartphone's Bluetooth is powered and paired with the POS machine to transfer the amount.

Paytm

Almost all of us are familiar with Paytm. It is the e-payment application with the largest user base in India. Paytm offers a variety of payment methods: e-wallet, credit or debit card, UPI, netbanking, QR-based payment and so on. A large number of retailers accept Paytm payments. The app also has its own e-shopping section, Paytm Mall.

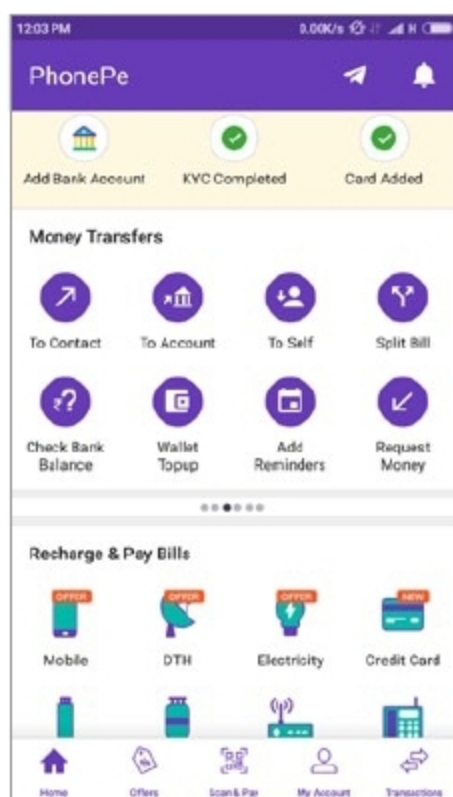

A new initiative of Paytm is the

introduction of Paytm Payments Bank. The bank provides you with a complete digital banking platform, including savings account, digital passbook, virtual debit card and various investment schemes. Soon, physical copies of the debit card and passbook will also be available.

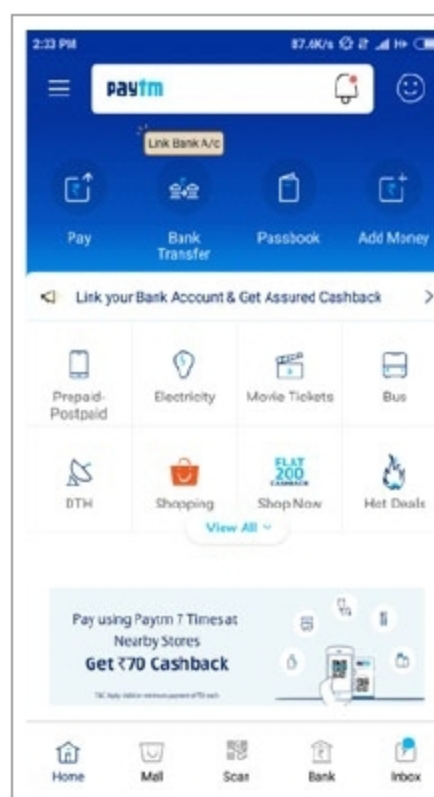

The user interface of the application may appear cluttered and complicated at first, but the extent of features to be fitted in one platform necessitates this mode of accommodation. Overall, Paytm covers all your financial maintenance needs.

Jio Money

Reliance Jio expanded its presence to e-payments with Jio Money. This wallet-based application is easy to use with a user-friendly interface. You can hold a single Jio Money account, which is linked to your phone number.
