Logging in to BHIM SBI Pay

BHIM SBI Pay

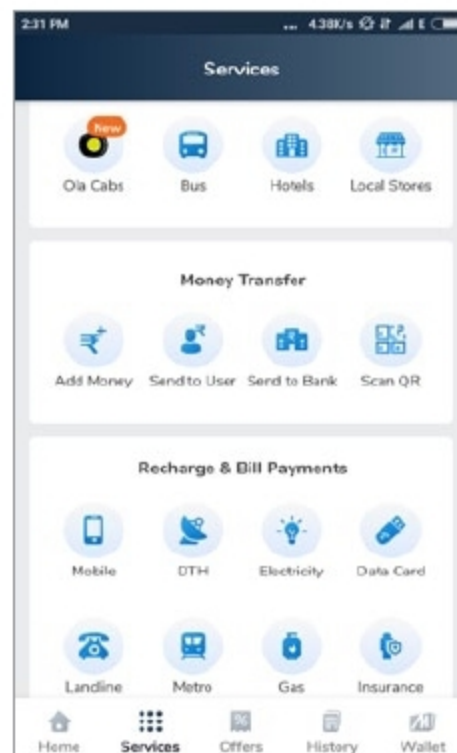

State Bank of India has brought to us its own UPI-based digital payment solution, called BHIM SBI Pay. The only prerequisite for using this app is that you have an account with a bank, which complies with UPI platforms. (Most major banks do; do verify before use.)

On registration, you will generate a Virtual Payment Address (VPA), in the format `xyz@sbi`. As soon as this is done, you are eligible to do transactions that do not require any bank details, only a unique VPA.

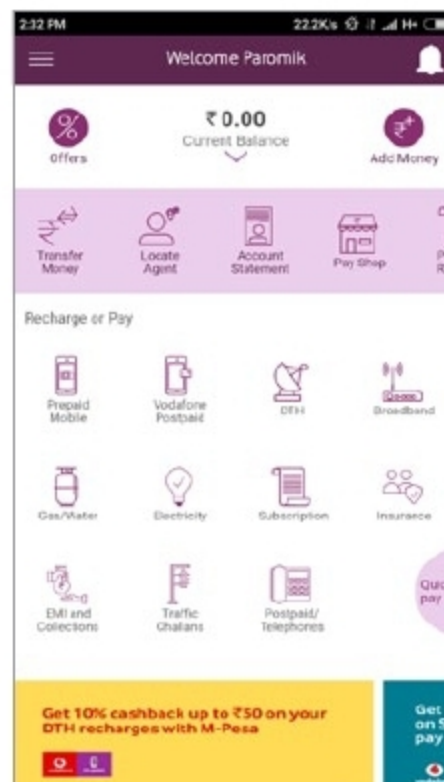

Apart from the VPA, you also have access to other transaction methods like netbanking, QR-driven transfer or using Aadhar. There is no wallet or money-storage process involved. However, you can link multiple bank accounts to a single VPA.

Oxygen Wallet

One of the earliest entrants in the e-payments market, Oxygen Wallet is accepted across many retail outlets in India. It offers a simple wallet-to-bank transfer method, requiring necessary bank account details. Mobile recharg-

Mobikwik wallet and its various features

M-Pesa app

a very clean and simple interface with a variety of features like booking an Ola cab, checking out nearby retail stores, finding the nearest petrol pump and the like. Apart from wallet-based transfers, transactions can also be done via QR scanning, UPI and bank-based transfers. You can send money from your wallet to bank accounts via IMPS.

Vodafone M-Pesa

Vodafone's M-Pesa is a swift mobile wallet, especially for mobile recharges and bill payments. Its Quick Pay feature allows a one-click transaction based on your

most used transaction history. Moreover, you can transfer money to bank accounts or withdraw an amount from M-Pesa account as needed.

MobiKwik

MobiKwik has garnered a very large user base, both from customers and merchants. It is accepted widely at retail stores, online shops, for mobile recharges as well as at utility and billing services.

This wallet-based application has

Electricity bills, DTH subscriptions, Internet bills, online payments and all such services are payable through M-Pesa. You will need to complete your Aadhaar-based KYC at the nearest Vodafone store to avail these services.

You can find more such payment options that can help you go cashless, hassle-free. Let us know which one you use the most. **EFY**
