

For Your Lab in 2018-19

Six New High Grade Test Instruments from

Aplab

that compare the best in the world!

Compare Specifications • Compare Engineering • Low Cost of Ownership

2100 Series

- Combine with DDS and PLL Techniques
- 1500MHz Maximum Frequency
- 1 ppm High Accuracy, Less Distortion
- AM, FM, FSK, PSK Modulation
- USB Device, RS-232

SA3000 Series

- All-digital IF technology
- Frequency Range: 9kHz to 1.5 / 2.2 / 3GHz
- DNAL: -140dBm / Amplitude Resol'n: ± 1.0 dB
- Phase Noise: -80dBc / Hz (10kHz offset)
- RBW: 10Hz to 1MHz, step 1-3-10
- Tracking Generator / 7" TFT LCD
- USB Host, USB Device, LAN, RS232

AWG80D / AWG120

- Dual Channels Outputs with same Resolutn
- 500 MS/s Sampling Rate, 14 Bits Resolution
- 2 ppm High Accuracy to Ensure HiQ Waveform
- Full and Complete Modulation Functions
- Arbitrary Waveform Edit PC Software

DMM5052 / DMM5061

- VFD display - True 6 1/2 digits
- Reading rates up to 1000 readings per second
- True RMS measurement of AC voltage and current
- Built-in math operations
- Standard interface RS-232 and USB device, optional interface of GPIB

PQA2100 / PQA2100E

- PQA2100 / PQA2100E Power Quality Analyzer is the professional portable device to measure and analyze the power system quality, supply the harmonics analysis and power quality data analysis, also provide big memory for the data storage, which is used to make the long term logger measuring to power system. The PC software can simply upload the data to PC for full analysis.

4300R

- A new gen Accurate Impedance Tester
- High accuracy, wide measurement range and six digits resolution.
- Many test freq. up to 300kHz/ Test voltage of 5mV ~ 2V, with -5V ~ 5V DC bias.
- Ideal for production line quality assurance, incoming inspection and lab measurements
- RS232C and GPIB interfaces and simple test commands
