

No More DVDs With EFY

The DVDs sent to EFY Plus magazine subscribers are being discontinued from July 2018 issue. However, they will continue to get their copies by courier as before. Also, to compensate for the DVDs, their remaining subscription period would be extended proportionately.

So from July issue there will be only one kind of EFY magazine. Also, the subscribers will continue to get access to digital edition of the magazine every month as before.

The DVDs are being discontinued after a small survey we did some time ago, when 90% of EFY Plus subscribers opted for additional copies of the magazine in lieu of the DVDs. The general thinking is that, DVDs are no longer required as software downloading has become much faster with 4G. For this reason, most laptops do not have any DVD drive now.

Incidentally, EFY magazine will complete its 50th year in December this year!

Happy reading!
