

Smartphone

Tailored to fit the untailored

Android One brings a Google-designed software experience to Nokia 8 Sirocco. The phone comes with a streamlined and easy-to-use interface, curated set of pre-installed apps and free, unlimited high-quality photos storage with Google Photos. Nokia 8 Sirocco is the company's fastest Android smartphone to date—also one of the fastest smartphones on Qualcomm Snapdragon 835 mobile platform.

Nokia 8 Sirocco is carved out of a single piece of stainless steel, machined for hours into a solid, yet slim and compact shape. Full 3D Corning Gorilla Glass 5 curves around all sides to provide real beauty that you can see and feel. The wide-angle 12MP rear camera with ZEISS optics and 2x optical zoom ensures crystal-clear memories from even the blurriest of weekends, or a gourmet look at yesterday's leftovers. With new Pro Camera mode, you can take control of every image, manually adjusting white balance, focusing, ISO, shutter speed and exposure compensation separately. Make simple, intricate adjustments and see the results in real time.

The phone has power in reserve for effortless performance with 6GB RAM and 128GB internal storage. It allows wireless charging and the ability to charge 50 per cent in 30 minutes. Nokia 8 Sirocco is IP67 water resistant, too.

Air purifiers

Innovation in personal health and well-being

Philips India has introduced a range of smart and innovative air purifiers. These new products, Philips 3000i and 5000i series, will empower families to take control of indoor air quality, and help reduce triggers that aggravate a child's allergy symptoms. To help make the home environment cleaner, Philips air purifiers have been specifically developed to significantly improve the quality of indoor air. The new range includes the 2-in-1 air purifier and humidifier Mario (AC3821), MicroCube (AC5659) and Puma DI (AC3259). Equipped with VitaShield IPS, AeraSense and NanoCloud technology, these air purifiers help improve indoor air quality while easing asthma and allergy symptoms in children and adults.

The air purifiers use true HEPA filters and are tested to remove 99.9 per cent of PM2.5, bacteria, H1N1 and 99.97 per cent of 0.3µm particles, which is the size of common allergens in the air. The products also include the unique numerical index, corresponding colour ring and connected app, making it easy to track and control air quality at home, alerting in real time to even the slightest change in indoor air conditions.

Wireless charging pad

Built-in overvoltage and heat protection for safe charging

Astrum has launched its first wireless charging solution, PAD CW300, for true wireless charging with Qi version, optimised for faster and efficient charging. The charger is easy to use and effortlessly connects to all Qi-enabled smartphones and devices, including those from Apple and Samsung. With 15W output power, the charger offers super-fast charging and a high-quality experience.

Simply place your Qi-enabled device on the pad to charge and get started. The charger is acclaimed for being the first charger to wirelessly power Android phones at DC output power up to 15W and iOS devices at 7.5W. PAD CW300's desktop stand is designed to provide you with a better viewing angle for the screen. The charger also boasts of an intelligent chip that monitors and adjusts the charging temperature. It comes with built-in overvoltage, short-circuit and overheating protection for safe charging.
