Are You In Suspense?

Are you wondering what happened to your order or payment, even after a fortnight? But did you mention your name and address clearly while sending payment, and what the payment was for?

We get several payments every month without adequate instructions or even identity of the person sending the payment. As a result we are unable to take appropriate action on these, till we get a complaint - if at all.

At EFY, we want you to be our satisfied customer. So please do let us know in case your payment or instructions are not even acknowledged within a fortnight. We are not that lazy!

Passport holder-cum-power bank

A traveller's delight

Portronics has launched Power Wallet 4K, a passport holder with an inbuilt 4000mAh power bank and dual connector charging cable. The multi-functional device allows you to secure all important travel documents such as passport, tickets, boarding passes and credit cards in one place, and the 4000mAh lithium-polymer battery with 5V/2A DC output ensures charging on-the-go. The power bank is 21cm x 14cm x 3cm in size and weighs 225 grams.

Learn JavaScript for free with Google's latest mobile game

To help beginners learn how to code on their smartphones, tech giant Google has launched a learn-to-code app called Grasshopper. The goal of the app is to get coders proficient in the basics and core concepts, so that they can take the next steps in their coding education. The app offers several courses, beginning with The Fundamentals, where users can learn how code works. It has two more courses where coders learn to draw shapes using D3 library and later create more complex functions using D3.

Kinsane launches edutainment app, KinToons - Nursery Rhyme DJ

KinToons - Nursery Rhyme DJ is a first-of-its-kind interactive educational app that redefines a child's exposure to nursery rhymes. With this app, kids are able to create their own mixes of popular nursery rhymes, performed in real time by four lovable characters from KinToons show. The app comes with a variety of cheerful rhymes, playful characters and colourful graphics, which help spark the imagination and creativity of kids. This app is only available on App Store for iOS devices.

The prices, features and specifications are based on information provided to us, or as available on various websites and portals. EFY cannot vouch for their accuracy.

321 Launch, an AR app for science nerds

USA Today has delivered an augmented reality (AR) hologram rocket launch experience on their 321 Launch app. Space experts from Florida Today guide you through this one-of-a-kind experience. During a live launch, watch an AR rocket lift off from any flat surface, as an animated hologram shows you what the actual rocket is doing in real time. Telemetry data generates a predictive flight path, allowing you to follow speed, acceleration and altitude of an active launch live in AR, simply by pointing your phone towards the sky. Also, check out launch simulation as space experts guide you through an interactive rocket assembly, readying the launch pad and blasting off towards the exosphere, before separation and re-entry. You control a launch mission in this interactive AR experience, and learn what it takes to launch a rocket from Kennedy Space Center.

Video Meet app from XgenPlus

Video Meet app allows you to initiate and experience high-definition, multi-point audio/video collaboration without dedicated telecom networks. Even a phone without a SIM card works with Wi-Fi Internet. The app works on multiple devices, such as mobilephones, tablets, desktops, laptops and room systems, and no one can join the conference without an invitation.
