

ST25DV series

Dynamic NFC/RFID tags

ISO/IEC 15693 NFC Forum Type 5

life.augmented

Dynamic ISO/IEC 15693 NFC Forum Type 5 tags with I²C interface, fast transfer mode and energy harvesting

ST25DV is the new member of the ST25 family. It is a future-proof dynamic tag compliant with NFC Forum Tag Type 5 and ISO/IEC 15693 standards, which offer a wide range of new features and capabilities. The EEPROM memory bank can be accessed either by a low-power I²C interface or by an ISO/IEC 15693 RF interface operating at 13.56 MHz. An additional 256-Byte Fast Transfer Mode buffer allows a rapid data transfer between the RF and I²C part. It also features an energy harvesting and RF status function. In addition, the series offers multiple 64-bit passwords for a flexible data protection mechanism.

KEY FEATURES

- Industry standard interfaces:
 - I²C: 1MHz from 1.8 to 5.5V
 - ISO/IEC 15693 NFC Forum Type 5
- 13.56 MHz carrier frequency
- 4-, 16- and 64-Kbit user EEPROM
- 256 Bytes Fast Transfer Mode buffer
- 64-bit unique identifier
- 64-bit password protection
- Energy harvesting
- Configurable Output signal (GPO)
 - RF Field detect
 - Several RF interrupts
- Low-power mode

- High-reliability EEPROM
- Flexible password protection scheme
- Simple and cost-effective
- New functions and capabilities for device calibration, product activation

MAIN APPLICATIONS

- Industrial equipment
- Maintenance, repair and operations (MRO)
- Medical equipment
- Consumer electronics
- Electronic Shelf Label (ESL)
- Asset tracking
- Traceability information management
- Logistics
