

Parts of a digital camera (Credit: www.pctechguide.com)

auto-adjustment of light and brightness. Optimum ISO range is from 100 to 6400. It can go below 100 and above 6400, too. Choose as per your requirement.

Shutter speed. Common shutter speeds are 1/250, 1/125, 1/60, 1/30 and 1/15. More light enters through the lens with slow shutter speed, while fast shutter speed decreases the amount of light. Fast shutter speed can freeze movement, while slow shutter speed can be used in low-light situations. Small aperture and fast shutter speed result in very dark photos, while slow shutter speed and large aperture result in over exposure.

Battery, storage and screen. Battery is compatible with the camera. Check for power of at least 1850mAh.

Size of the LCD screen on the camera is usually between 5cm and 7.6cm (2-inch and 3-inch). It takes up a lot of power but is desirable for editing and selection purposes. You can view the photos on it and decide what you want to keep/discard.

The viewfinder on the camera lets you look at the subject while taking pictures, while you can use the LCD as a monitor to see the results.

A memory card of minimum 16GB is recommended.

Connectivity. A Wi-Fi-enabled camera lets you connect the camera to a printer or a smart TV wirelessly. Software installed on the camera helps you select the images you want to print and send to the printer.

By connecting your digital camera to a TV, you can view the images

Nikon D3400

Cannon 800D

GoPro Hero6

on the big screen. Connect the two devices wirelessly, or use a cable.

Battery power. Choose rechargeable nickel-metal-hydrate battery cells with an AC adaptor to charge. These have more power and are safer for the environment.

Some digital cameras for personal use

Nikon D3400. It features 24.2MP resolution with an optical viewfinder, screen size of 7.6cm (3-inch) and 1080 pixels. Nikon's SnapBridge Bluetooth provides wireless connectivity for transferring images directly to your smart device. However, this camera does not come with a touch-screen or microphone. It has a superb battery, ISO 100-25600 and storage capacity of 64GB. It is available for ₹ 31,500.

Canon EOS Rebel T7i/800D. Some features are 24.2MP resolution, optical viewfinder, 7.6cm (3-inch) touch-screen, ISO 100-25600, 5-axis image stabilisation, Bluetooth connectivity, 18mm - 55mm lens, 16GB memory card and inbuilt red-eye correction flash. It has a price tag of ₹ 54,900.

GoPro Hero6. This camera comes with 5cm (2-inch) touchscreen, 12MP resolution, wide-angle f/2.8 lens, 240fps video, built-in microphone, GPS receiver, night mode for low-light shoots, and is waterproof up to 10mm and Wi-Fi-enabled. The camera is suitable for underwater use, and is available for ₹ 33,399.
