

4SDot PoE IP camera

For a single camera setup, a wireless device can be handy. On the other hand, if you prefer wired cameras, go for ones that have Power-over-Ethernet (PoE) support. In this setup, the cameras are lined with cables that connect to a PoE switch, which, in turn, connects to the Wi-Fi router. PoE offers uninterrupted consistent video-recording. For a multi-camera requirement, PoE setup is recommended.

Video features. Live streaming is another feature that most modern cameras come with. Sensor-driven video-recording can be very useful, as it allows the cameras to record as soon as any motion is detected. You can view the recordings in real time via cloud.

Quality of video is also an important consideration point. Cameras having 720-pixel HD resolution are more common in the market in comparison with 1080p full-HD video recorders. Higher quality video will require a larger storage space. Field-of-view of the lens, which determines its diameter of coverage, should be 120 degrees or above. Surveillance cameras also store still images. Camera resolution should preferably be between 1.3 and 2.0 megapixels with a high zoom capacity.

Mobile control. Mobile application-controllable offerings come with some bonus features. Two-way audio support enables video-based interactions from both sides. You can set alarms and notifications as required to further secure your premises. Operations such as real-time video streaming, cloud access and so on are also done through mobile apps.

Finally, check for standardised

weather-proofing. For example, IP66 rating ensures durability in outdoor weather conditions.

Options in the market

There is a huge selection available in the market, at various price points. We enlist a few of the latest ones below.

4SDot PoE IP camera. This full-HD (1080p) quality camera can be connected using PoE. In night vision mode, it can record up to a distance of 15 metres. Six LED light pieces enable clear video quality even in night mode. Mobile application-based usage allows live video feed. It is operable through a proprietary software as well as with compatible third-party software. It is available for ₹ 6500 online.

IFITech IFIPT2 PTZ IP camera. India-based startup IFI Technology has come up with 2MP 1080p full-HD surveillance camera. It is rotatable by 355 degrees horizontally and 120 degrees vertically. It has a microSD expansion facility of up to 128GB. Network-based video recording allows live video streaming. Configuration of the system can be done through mobile application or over PC. The camera is equipped with features like two-way audio interaction, motion detection-based alerts and so on. Night-vision mode supports a view up to 7.9m (26-feet). With many more useful features, this camera is available for ₹ 5850 on the company's website, ifihomes.com

iBall Guard Starlight colour night vision camera. iBall has a new offering in its surveillance cameras inventory. Starlight colour night vision system is a 2MP, cable-powered camera that provides colour as well as
